## **APPENDIX #5**

CROUSE-HINDS DIVISION COOPER INDUSTRIES

SYRACUSE, NEW YORK

LETTER TO P. J. VASSALLO FROM NORMAN NOSENCHUCK (3-9-84)

## New York State Department of Environmental Conservation 50 Wolf Road, Albany, New York 12233-0001

Henry G. Williams Commissioner

MAR 09 1984

Mr. P.J. Vassallo Vice President, Manufacturing Crouse Hinds Electrical Construction Materials P.O. Box 4999 Syracuse, New York 13221

Dear Mr. Vassallo:

Re: Site Classification for the Crouse Hinds 7th North Street Site Site ID #734004

Thank you for your letter of January 31, 1984 concerning your company's 7th North Street Site in Syracuse, New York. I can understand your concern over the designation of classification code #2 for your site. This classification code was assigned based on a Hazard Ranking System (HRS) score of 29.40, determined through an investigation conducted by Engineering-Science, Inc., in June of 1983. Last November, when our Division prepared the 1983 Annual Report, the Engineering-Science report of June 1983 was thought to be the most up-to-date information that we had concerning the condition of your site. When an HRS score exceeds 28.5, the classification is automatically established as 2. Staff preparing the report was not aware of your August 18, 1983 letter concerning a reassessment of the HRS score until after our report was published.

Your revised HRS score of 10.51 places your site within classification #3. Barring any unforeseen changes in the condition of your site, the classification code will remain as 3 for the 1984 Annual Report.

I am sorry for any inconvenience that the improperly assigned classification code may have caused you. If we can be of any further assistance, please feel free to contact Mr. Robert A. Olazagasti of my staff at (518) 457-0747.

Sixcerely,

Norman H. Nosenchuck, P.E.

Director

Division of Solid and Hazardous Waste

### CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Mr. Brian Biittner Crouse Hinds - ECM Wolf & Seventh North Streets Syracuse, New York 13221

Re: Issuance of Final Industrial Wastewater Discharge Permit #5

Mr. Biittner:

Please find enclosed the Final Industrial Wastewater Discharge Permit #5 for the Wolf Street facility. As you are aware, the standard permit language has undergone several revisions during the past year in order to comply with USEPA standards. In addition, the permit has been modified in accordance with your January 14 and January 25, 1993 comment letters and the January 19, 1993 meeting with representatives of this office.

Specifically, the self-monitoring schedule for sewer #2 (Table VIi) has been modified to one grab sample per quarter and flow values may be calculated rather than metered. In addition, the Rotoclone airflow determination may be calculated based on hours of operation and manufacturer's specifications.

The request to provide flow information for only four days per quarter for sewers #1 and #3 is denied. Flow values for daily maximum flow rate (GPM) and total daily discharge (GPM) must be reported for each day of operation during each reporting period. It is understood that the flowmeter for sewer #1 was scheduled to be operational by the end of June and that the flowmeter for sewer #3 will be operational upon completion of the metal finishing pretreatment system upgrade.

The reference in the December 30, 1992 draft permit to section XV.B.7.d was incorrect. The section referenced requires the permittee to have all self-monitoring reports signed by the signatory representative designated in accordance with Section XVIII -- Signatory Requirements. The appropriate section designation is XV.B.10.d. This requirement is not subject to modification, therefore, no additional comment period is necessary.

Be advised that the discharge of Aluminum Grinding Scrubber process wastewater is prohibited (Permit Section III.A.9) in accordance with EPA Effluent Guidelines and Standards for Metal Molding and Casting, 40 CFR Part 464, Subpart A, Aluminum Casting Subcategory (attached), 464.15(e), which states:

464.15(e) "Grinding Scrubber Operations.

No discharge of process wastewater pollutants to a POTW."

On August 16, 1993, this office transmitted a letter detailing procedures for collecting permit fees with comments on the draft permit. For those industries whose draft permit is currently being finalized, a permit fee must be remitted upon receipt of the final permit. Therefore, be advised that Crouse Hinds must remit a payment of \$400 by September 24, 1993, to:

Onondaga County Department of Drainage and Sanitation 650 Hiawatha Boulevard West, Syracuse, New York 13204-1194 Attention: Fiscal Officer/David Frachetti

The fee of \$400 is based on Crouse Hinds' average daily flow (calculated as part of the 1992 industrial waste surcharge) being 323,000 gallons per day.

Please review the enclosed permit carefully all requirements are binding upon the permittee as of the date issued listed on the cover page of the permit. The first self-monitoring report will be due on October 30, 1993 for the period from July 1 through September 30, 1993.

Should you have any questions please contact Joseph J. Mastriano or Daniel R. Ramer.

Sincerely,

DEPARTMENT OF DRAINAGE AND SANITATION

JOHN M. KARANIK, Commissioner

/dr Attach.

### **LIST OF TABLES**

	Table Name	Page Number
Table I:	40 CFR 433, Metal Finishing Discharge Limitations: Se	ewer #3 3
Table II:	40 CFR 464, Effluent Limitations: Sewer #4	4
Table III:	Onondaga County Effluent Limitations: Sewer #1 and	#2 5
Table IV:	Self-Monitoring Report Schedule	
Table V:	Self-Monitoring Sample Schedule: Sewer #1 and #3.	14
Table VI:	Self-Monitoring Sample Schedule: Sewer #4	
⊤able VII:	Self-Monitoring Sample Schedule: Sewer #2	

#### I. AUTHORITY

- A. This permit is hereby promulgated by the Commissioner of the Onondaga County Department of Drainage and Sanitation to regulate the discharge of wastewater, polluted or unpolluted, to the sanitary sewer system, under the authority of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System (the Rules and Regulations) and the Onondaga County Administrative Code.
- B. Article VII of the Rules and Regulations provides that any violation of this permit may subject the permittee to a fine of one thousand dollars per day per violation. In addition Articles VI and VII of the Rules and Regulations specify other penalties and procedures the Department may employ for any violation of this permit or the Rules and Regulations.

### II. PERMITTED WASTEWATER DISCHARGE

- A. The permittee is authorized to discharge the following to the County sewer system:
  - 1. sanitary wastewater from Sewer #2;
  - 2. wastewater from the electroplating process pretreated to meet the United States Environmental Protection Agency (USEPA) discharge standards for the Metal Finishing Point Source Category (Sewer #3);
  - 3. wastewater originating from the rotoclones in the foundry operations, pretreated to meet the USEPA discharge standards for the Metal Molding and Casting Point Source Category (Sewer #4); and,
  - 4. wastewater originating from the machining process area pretreated using an Oil/Water separator (Sewer #1).
- B. All wastewater discharged to the sanitary sewer system must comply with the effluent limitations set forth in Section IV of this permit, Article III of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System, 40 CFR 433, and 40 CFR 464 unless otherwise indicated by this permit, expressly or by implication.

#### III. PROHIBITED DISCHARGES

- A. In accordance with Article III of the Rules and Regulations the following wastes shall not be introduced into the Onondaga County Sanitary Sewer System:
  - 1. wastewater constituents which by their introduction to the sewer system, cause pass-through (pursuant to Sections 3.01(d), 3.01(f), and 3.01(g));
  - 2. wastewater constituents which by their introduction to the sewer system, cause interference (pursuant to Sections 3.01(b), 3.01(d), 3.01(i), and 3.01(j));
  - 3. wastewater which has the potential to create a fire or explosion hazard in the publicly-owned treatment works (POTW), including wastewater having a closed-cup flashpoint less than 140°F, are prohibited (pursuant to Section 3.01(a));
  - 4. wastewater having a pH lower than 5.5 or higher than 9.5 S.U. (pursuant to Section 3.01(c));
  - 5. wastewater constituents which result in the presence of toxic gases, vapors or fumes within the POTW in a quantity that may cause acute worker health and safety problems (pursuant to Sections 3.01(a), 3.01(d), and 3.01(e));
  - 6. batch discharges without prior written approval from the Commissioner. Any request to discharge such wastewater must be submitted in writing to this office and is subject to approval on a case-by-case basis. (see section XV.B.6)
  - 7. The introduction of wastewater having a temperature greater than 150 °F into the sanitary sewer system or at a quantity such that the temperature at the headworks of the POTW exceeds 104 °F is prohibited (pursuant to Section 3.01(i)).
  - 8. The discharge of non-contact cooling water and other unpolluted wastewater is prohibited (pursuant to Section 3.02).
  - 9. Any wastewater that will subject the receiving POTW to reporting and permitting regulations of the Resource Conservation and Recovery Act (RCRA) (40 CFR 270.1 (c) and 270.60 (c)) is prohibited from discharge.
  - 10. All other wastes which are prohibited by Article III of the Rules and Regulations, 40 CFR 433 and 40 CFR 464. Specifically, in accordance with 40 CFR part 464.15 (e) all aluminum grinding scrubber process wastewater is prohibited.
- B. In addition to the above prohibitions, dilution shall not be used as a substitute for pretreatment.

### IV. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS

A. The permittee shall comply with the Pretreatment Standards for Existing Sources in the Metal Finishing Point Source Category - 40 CFR Part 433.15 (detailed below) at the point of discharge into Sewer #3.

Table I: 40 CFR 433.15 Effluent Limitations at Sewer #3

	Discharge Limitation	
Parameters	Daily Maximum (mg/l)	Monthly Avg. (mg/l)
Total Cyanide (T-CN)	1.20	0.65
Amenable Cyanide (CN-A) ¹	0.86	0.32
Total Copper (Cu)	3.38	2.07
Total Nickel (Ni)	3.98	2.38
Total Chromium (Cr)	2.77	1.71
Total Zinc (Zn)	2.61	1.48
Total Lead (Pb)	0.69	0.43
Total Cadmium (Cd)	0.69	0.26
Total Silver (Ag)	0.43	0.24
Total Toxic Organics (TTO's) ²	2.13	

The amenable cyanide limit may be substituted for the total cyanide limit for industrial facilities with cyanide treatment. Refer to 40 CFR 433.15.b for more details.

For the Purpose of this permit, Total Toxic Organics for wastestreams regulated under 40 CFR 433.14 (Sewer #3) are defined as detailed in Section XV.B.2.a of this permit.

### IV. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS (continued)

The permittee shall comply with the Pretreatment Standards for Existing Sources in the Metal Molding and Casting Point Source Category - USEPA 40 CFR Part 464 Subpart A - Aluminum Casting and Subpart C - Ferrous Casting Subcategory (detailed below) at the point of discharge into Sewer #4. 40 CFR 464.35(c)(1) and 40 CFR 464.15(d) discharge limitations are applicable (see Appendix C for limits calculations).

Table II: 40 CFR 464.35(c)(1) and 464.15(d) PSES Effluent Limitations at Sewer #4

Parameter	Discharge Limitation		
	Maximum Mass-Based One-Day Limit (POUNDS/BILLION SCF OF AIR SCRUBBED)	Maximum Mass-Based Monthly Average (POUNDS/BILLION SCF OF AIR SCRUBBED)	
Total Copper (Cu)	0.218	0.12	
Total Lead (Pb)	0.398	0.195	
Total Zinc (Zn)	0.736	0.278	
Total Phenois	0.646	0.225	
Oil & Grease (O&G)	22.5	7.51	
Total Toxic Organics (TTO's) ³	2.04	0.664	

For the purpose of this permit, Total Toxic Organics for wastestreams regulated under 40 CFR 464.35 (Sewer #4) are defined as detailed in Section XV.B.2.b of this permit.

#### IV. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS (continued)

C. The wastewater discharge of the permittee shall comply with the following effluent limitations for Sewer #1 and Sewer #2 at the point of discharge into the County sanitary sewer system.

**TABLE I: Onondaga County Effluent Limitations** 

	Discharge Limitation		
Parameter	Daily Allowable (mg/l) ⁴	Instantaneous Allowable (mg/l) ⁵	
Total Cadmium (Cd)	2.0	3.0	
Total Chromium (Cr)	8.0	12.0	
Hexavalent Chromium (Hex-Cr)	4.0	6.0	
Total Copper (Cu)	5.0	7.5	
Total Lead (Pb)	1.0	1.5	
Total Mercury (Hg)	0.02	0.03	
Total Nickel (Ni)	5.0	7.5	
Total Silver (Ag)	1.0	1.5	
Total Zinc (Zn)	5.0	7.5	
Total Cyanide (T-CN)	2.0	3.0	
Total Phenolic Compounds	3.0	4.5	
5-Day Biochemical Oxygen Demand (BOD ₅ )	6	6	
Total Suspended Solids (TSS)	6	6	
Total Kjeldahl Nitrogen (TKN)	6	6	
Total Phosphorus (TP)	6	6	
Oil and Grease (O&G)	100	150	
рН	5.5-9.5 S.U.	5,5 - 9,5 S.U.	
Temperature	150°F	150°F	

As determined by a composite sample (as defined by Article II, Section 2.02 of the Rules and Regulations) of the permittee's daily discharge over the operational and/or production period.

As determined by a grab sample (as defined by Article II, Section 2.02 of the Rules and Regulations) of the permittee's discharge at any time during the daily operational and/or production period.

#### IV. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS

Permission is hereby granted to exceed the numerical values for BOD₅, TSS, TP, TKN contained in Article III, Section 3.07 (Special Conditions) of the Rules and Regulations. An INDUSTRIAL WASTEWATER SURCHARGE based upon percent contribution will be assessed in order to recover costs incurred by the POTW for treatment of the above wastewater constituents (refer to Article V of the Rules and Regulations). The Commissioner reserves the right to place concentration-based or mass-based limitations upon the discharge of the above wastewater constituents, in accordance with Section 3.07 of the Rules and Regulations, if deemed necessary.

#### V. NOTICE OF ACCIDENTAL DISCHARGE

- A. In accordance with Article IV, Section 4.10 of the Rules and Regulations, the permittee shall at its own expense provide protection from accidental discharge of prohibited materials to the sanitary sewer system as defined in Section III of this permit and Article III of the Rules and Regulations.
- B. Any wastewater released in accordance with the following conditions and Section V.A. of this permit shall require the permittee to provide notification in accordance with Section V.C. of this permit:
  - Breakdown of industrial waste pretreatment equipment:
  - Accident caused by human error or mechanical failure; and
  - Other causes, such as acts of nature.

#### C. Notification Procedures

- 1. In the event of any accidental discharge, (as defined above) the permittee shall immediately notify the operator of the receiving treatment plant and the Commissioner by telephone (435-2260 between the hours of 8:00 am-4:30 pm weekdays and 435-3142 or 435-3182 between the hours of 4:30 pm-8:00 am weekdays or all day on weekends).
- 2. In accordance with Article IV, Section 4.10, of the Rules and Regulations, following the telephone notification, the Commissioner shall be notified in writing within five (5) days. Said written notification shall include the following information.
  - a. The cause of the accidental discharge;
  - b. A description of the accidental discharge;
  - c. Anticipated time the condition is expected to continue, or if such condition has been corrected, the duration of the period of accidental discharge:
  - d. Steps taken by the permittee to reduce and/or eliminate the discharge; and
  - e. Steps to be taken by the permittee to prevent recurrence of the condition which caused the accidental discharge.
- D. Nothing in this section of the permit shall be construed to relieve the permittee from the penalties for noncompliance with this permit or the Rules and Regulations (Article VII Enforcement and Penalties).

#### VI. CHANGE IN WASTEWATER DISCHARGE

- A. In accordance with Article III Section 3.12 of the Rules and Regulations, the permittee shall notify the POTW in advance of any change in the volume or characteristics of wastewater discharge practices not explicitly permitted under Section II.
- B. All discharges authorized herein shall comply with the terms and conditions of this permit.
- C. Any industrial facility expansions, production increases or process modifications which result in new, different or increased discharges of wastewater must be reported by submission of a new industrial waste disposal questionnaire pursuant to Article IV, Section 4.02, of the Rules and Regulations.
- D. This permit may be modified to specify and limit any new or increased pollutants.

# VII. TRANSFER OF OWNERSHIP CONTROL

- A. At least thirty (30) days prior to any change in the ownership of the industrial facilities from which the authorized discharges emanate, the permittee must notify the Commissioner in writing of the pending transfer.
- B. The current owner shall then notify the succeeding owner or controller of the existence of this permit by letter, with a copy of the permit enclosed. In addition, notification of the impending transfer must be made to this office by a copy of the letter.
- The new owner must acknowledge receipt of the letter and the conditions and provisions of the discharge permit in writing to the previous owner and to this department.
- D. Once this office is notified of the transfer of the title, the Commissioner will provide written permitting procedures for the new owners.

#### VIII. RIGHT OF ENTRY

- A. In accordance with Article IV, Section 4.08, of the Rules and Regulations, the permittee shall allow duly authorized employees or representatives of the County to enter the permittee's premises at all reasonable times for the purpose of inspection, observation, flow measurement, sampling and testing.
- B. In accordance with Article VII, Section 7.05 of the Rules and Regulations, the permittee shall allow duly authorized employees of the County to enter the permittee's premises without delay for purposes of investigating any condition or activity which in the Commissioner's (or his designee's) judgement presents an imminent danger to the public health, safety or welfare, or to the environment, or is likely to result in damage to the public sewer system.

#### IX. COUNTY MONITORING

- The monitoring of each industrial discharge and the recording of quantitative values shall be performed by authorized employees or representatives of the County according to schedules established by the Commissioner.
- B. The County monitoring effort does not in any way relieve the permittee of any of the self-monitoring requirements contained in Section XV of this permit.
- C. Composite and/or grab samples will be collected whenever possible over the production day including clean-up periods.
- D. 'The flowrate (gallons per day) shall be measured during each sampling period. Water use records may be substituted in place of flow measurement.
- E. Additional sampling and flow measurement may be performed by the permittee using approved methods. The data obtained by the permittee may be used at the discretion of the Commissioner as supplemental data to demonstrate compliance with permit effluent limitations and pretreatment standards or to be used in addition to county data for computations of the Industrial Wastewater Surcharge.
- F. All sampling and analyses shall be performed in accordance with approved USEPA methods (40 CFR 136) as stated in the latest approved edition of the following references:

STANDARD METHODS FOR THE EXAMINATION OF WATER AND WASTEWATER, American Public Health Association, New York, New York 10019.

METHODS FOR CHEMICAL ANALYSIS OF WATER AND WASTES, Environmental Monitoring and Support Laboratory, Office of Research and Development, Environmental Protection Agency, Cincinnati, Ohio 45268.

# X. PRETREATMENT FACILITIES

- A. The permittee shall provide and maintain, at its expense, industrial wastewater pretreatment, when required by the Commissioner, pursuant to Article IV, Section 4.09, of the Rules and Regulations.
- B. All reports, plans and/or specifications for new or modified pretreatment facilities or changes in method of operation must be approved in writing by the Commissioner or his designee. pror to implementation.

#### XI. PERMIT MODIFICATIONS

- In accordance with Article IV of the Rules and Regulations, this permit may be modified, suspended, or revoked in whole or part during its term for causes including, but not limited to, the following:
  - 1. Violation of any of the terms or conditions of this permit, or the Rules and Regulations;
  - 2. A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge;
  - 3. A pretreatment, effluent, or toxic effluent standard established under any local, state, or federal law for any pollutant which is present in the permittee's discharge where said standard or prohibition is more stringent than the limitation for the pollutant in this permit or the Rules and Regulations;
  - 4. Failure to submit payments of the Industrial Waste Surcharge; and/or,
  - 5. Failure to supply information to the Commissioner in accordance with Article IV, Section 4.03 (Permit Conditions) of the Rules and Regulations.

#### **II. MONITORING FACILITIES**

- A. In accordance with Article IV, Section 4.07, of the Rules and Regulations, if there are inadequate provisions for the collection of representative wastewater samples and discharge flow measurements, the Commissioner may require that an adequate monitoring facility be installed by the permittee at its own expense.
- B. The monitoring facility must be approved in writing by the Commissioner before installation.
- C. The permittee shall be responsible for all maintenance of the sampling manhole and calibration of the monitoring equipment.

#### XIII. WASTE MATERIAL DISPOSAL

- Any screenings, sludges, solids, waste oils, or other waste materials removed or separated from the permittee's authorized discharge or generated as part of the wastewater treatment process, shall be disposed of in such a manner as to prevent entry of such materials into navigable waters, ground water, storm drains, and the sanitary sewer system.
- B. The following information regarding the disposal of waste materials as defined above shall be reported to the County of Onondaga with each Self-Monitoring Report (SMR Form E).

1. List the source(s) of materials to be disposed of.

- FMG TLUBGE - DIN ELINGLEFHING - CYCLONIC FILTER

2. Describe the nature of the waste (hazardous or non-hazardous).

- a. If nonhazardous, describe the waste and how it is created.
- b. If hazardous, provide the 40 CFR Part 261, Subpart C designation for the waste removed (i.e. characteristic waste, listed waste or a mixture). If it is listed, provide the F,K,P or U listing for the waste material removed.
- c. List the facility's hazardous waste generator identification number.
- 3. Include the approximate volumes and weights of each waste material disposed of.
- 4. Describe the method by which the waste materials were removed and transported.
- 5. Report the company contracted to remove said materials and the final disposal or recovery location.

# XIV. COMPUTATION AND PAYMENTS OF INDUSTRIAL WASTE SURCHARGE

- A. The permittee shall pay its proportionate share of the cost for operation, maintenance, and debt retirement of the treatment system.
- B. These charges shall be computed by the Commissioner using the formulae in Article V, Section 5.02, of the Rules and Regulations.
- C. Payments shall be made to the County of Onondaga by the permittee no less often than annually unless prior written approval has been granted by the Commissioner.

- A. The permittee must submit Self-Monitoring Reports in accordance with the schedule detailed in Table IV.
  - 1. Failure to submit the Self-Monitoring Report (SMR) by the due date shall subject the permittee to the fines and penalties prescribed under Article VII of the Rules and Regulations.

TABLE IV: SELF MONITORING REPORT SCHEDULE

Period		
 Beginning	Ending	Date Report is Due
 January 1	March 31	April 30
April 1	June 30	July 30
 July 1	September 30	October 30
October 1	December 31	January 30

- 2. The SMR shall be submitted on the forms provided in Appendix A. Supplemental information, explanations, or clarifications may be provided in addition to the supplied forms. Official laboratory reports, waste materials disposal manifests, and equipment calibration reports (or copies thereof) must be included with the SMR.
- B. The SMR shall include the following:

### 1. Laboratory Analysis

- a. Each SMR shall contain the results of independent laboratory analysis of wastewater samples for the parameters listed in Table III (Form B).
- b. Samples to be collected on more than one day per reporting period must be collected on consecutive days typical of normal production unless otherwise indicated.
- c. All analyses must be conducted in accordance with the methodologies detailed in 40 CFR 136 and amendments thereto.
- d. Copies of official laboratory reports, including chain of custody (COC) records, must be included with each SMR.
- e. The contract laboratory must be certified by the New York State Department of Health (NYSDOH) for each parameter analyzed.
- f. Each SMR must include a summary of sampling and analytical methodologies employed (attach to SMR forms). Note that composite samples must be collected at a minimum rate of one sample aliquot every thirty (30) minutes.
- g. The concentration of any parameter analyzed for shall not exceed the effluent limitations detailed in Section IV (i.e. Table I) of this permit or any other applicable local, state, or federal standards.

h. The County must be notified in writing if any one of the USEPA Priority Pollutants (see Appendix B) is to be discharged to the sewer system. The County must be notified in order to evaluate the impact of any new discharge pursuant to Section VI of this permit.

#### 2. TTO Analyses (Forms B.4 and B.5).

a. For the purpose of this permit, TTO's are currently defined as the sum of the following pollutants at Sewer #3 (Form B.4):

Methylene Chloride

Benzene

Toluene Chloroform **Xylenes** 

Trichloroethene Ethylbenzene

Tetrachloroethene 1.2 Dichloroethane

Trans 1,2 Dichloroethene Carbon Tetrachloride

1,1,1 Trichloroethane

1.1 Dichloroethane 1,1,2 Trichloroethane

The Self-Monitoring report due on January 30 (see Table III) must contain the results of USEPA priority pollutant analyses . Once an approved Toxic Organic Management Plan is in place the permittee must certify that toxic organic chemicals are not being discharged to the sanitary sewer in the reports due on January 30 and July 30 (refer to section XV.B.12.f).

b. For the purpose of this permit, total toxic organics is currently defined as the sum of the following pollutants at Sewer #4 (Form B.5):

Methylene Chloride

1.2-Dichloroethane

Carbon Tetrachloride

1,1,1-Trichloroethane 1.1.2-Trichloroethane

Trichloroethane

1.1-Dichloroethane

2,4 Dichlorophenol

Trans-1,2-Dichloroethene

Butyl Benzyl Phthalate

Bis(2-ethylhexyl)phthalate

Di-n-butyl Phthalate

Dimethyl Phthalate

Tetrachloroethene

1.2-Benzanthracene 2,4-Dimethylphenol

Chrysene

Fluoroanthene

Chloroform

Benzene

Toluene

**Xvienes** 

Phenanthrene

Pentachlorophenol

Phenol

Naphthalene

Diethyl Phthalate

Anthracene

Acenaphthylene

Fluorene

Pyrene

- c. This office must be notified in writing if any of the USEPA priority pollutants not included on this list (see Appendix C) are to be discharged to the sewer system in order to evaluate the impact of such a discharge (in accordance with Section VI of this permit).
- d. The above listings are subject to change in order to reflect additional pollutants of concern in the permittee's wastewater.

TABLE V: SELF MONITORING SAMPLING SCHEDULE FOR SEWER #1 AND #3

Discharge Location	Parameters	Minimum Frequency of Analysis	Type of Sample
	Total Cadmium (Cd)	4 days per report	Composite
Sewer #1, Total Plant Effluent	Total Chromium (Cr)	4 days per report	Composite
	Hexavalent Chromium ⁷	4 days per report	Composite
	Total Copper (Cu)	4 days per report	Composite
	Total Lead (Pb)	4 days per report	Composite
	Total Mercury (Hg)	1 day per report	Composite
,	Total Molybdenum (Mo) ⁷	4 days per report	Composite
	Total Nickel (Ni)	4 days per report	Composite
	Total Zinc (Zn)	4 days per report	Composite
·	5-day Biochemical Oxygen Demand (BOD ₅ ) ⁷	4 days per report	Composite
	Total Suspended Solids (TSS) ⁷	4 days per report	Composite
	Total Kjeldahl Nitrogen (TKN) ⁷	4 days per report	Composite
	Total Phosphorus (TP) ⁷	4 days per report	Composite
	Oil & Grease (O&G) ⁷	4 days per report	Grab
	pH (Standard Units) ⁷	4 days per report	Grab
1	pH (standard Units) ⁷	see XV.B.3	Continuous Recording
,	Flow	see XV.B.5	Continuous Recording
	TTO's ⁸	1 day per report	Grab
	Closed-Cup Flashpoint ⁷	1 day per report	Grab

Self-monitoring of pH, BOD, TSS, TP, TKN, Hexavalent Chromium, Mo, Oil & Grease and flashpoint is required only at Sewer #1.

⁸ TTO's are defined for Sewer #3 in Section XV.B.2.a of this permit.

TABLE VI: SELF-MONITORING SAMPLING SCHEDULE FOR SEWER #4

Discharge Location	Parameter	Minimum Frequency of Analysis	Type of Sample
Sewer #4:	Total Copper (Cu)	4 days/report	Composite
Ferrous Foundry	Total Lead (Pb)	4 days/report	Composite
Discharge	Total Zinc (Zn)	4 days/report	Composite
	Total Phenois	4 days/report	Grab
	Oil & Grease (O&G)	4 days/report	Grab
,	TTO's ⁹	1 days/report	Grab
	Flow	Daily	Continuous Recording
	Rotoclone Airflow (Billions SCF)	Calculated from hours of operation (use form C.4)	Metered

TABLE VII: SELF-MONITORING SAMPLING SCHEDULE FOR SEWER #2

Discharge Location	Parameter	Minimum Frequency of Analysis	Type of Sample
Sewer #2: Sanitary	BOD ₅	1 day/report	Grab
Discharge	TSS	1 day/report	Grab
17.	TP	1 day/report	Grab
	TKN	1 day/report	Grab
	Total Flow (gpd)	1 day/report	Calculated

⁹ —O's for Sewer #4 are defined in Section XV.B.2.b of this permit.

#### 3. pH Monitoring

Instantaneous pH must be measured using field techniques and equipment at the time of sample collection (Form B). Each SMR must also include a summary of pH exceedences during the reporting period (Form G). The pH recorder chart must accompany the summary for exceedences detailed in Form G. Also include copies of the pH recorder charts for each of the four days of self-monitoring sample collection. Label each chart with date, time, and scale.

#### 4. Rotoclone Airflow (Form C.4)

Each SMR must contain the daily amount of air scrubbed by the Rotoclones.

#### 5. Water Usage

- a. Report the total amount of water consumed at the permitted facility during each reporting period (Form A). In addition to purchased water, include the amount of water drawn from private sources ( wells, streams, etc.).
- b. Include a summary of the total daily amount of water (gpd) and the maximum daily flow rate (gpm) of wastewater discharged to the sanitary sewer system during each day of the reporting period for each of the following discharge points: Sewer #1 (Form C.1), Sewer #3 (Form C.2), and Sewer #4 (form C.3).

#### 6. Batch Discharge Procedures

Include a summary of batch discharges in each SMR (Form D). Incorporate the following information:

- a. the approximate quantity in gallons of each batch discharge;
- b. the content and concentration (mg/l) of each batch prior to treatment;
- c. the final adjusted pH of the wastewater prior to batch discharge;
- d. the date of each batch discharge;
- e. each entry must be signed by an authorized representative of the permitted facility; and
- f. all batch discharges must be treated to comply with all applicable limits and standards detailed herein.
- g. Note that batch discharges require prior approval from the Commissioner.

# 7. Waste Material Disposal

In accordance with the provisions of Section XIII of this permit, each self-monitoring report must contain information regarding the handling and disposal of waste materials removed from the permittee's wastewater. The information must be documented on **Form E**.

#### 8. Equipment Calibration (Form F)

- a. Each SMR must include the results of equipment calibration.
- b. Equipment calibration must be conducted at least once per quarter by a certified manufacturer's representative (or other qualified third-party), for all pH and flow meters used to monitor the permittee's wastewater discharge.
- c. Each calibration summary must contain the written results of the calibration.
  - (1) Include the date of calibration:
  - (2) The amount of drift detected; and,
  - (3) The signature and title of the person performing the calibration and certifying the accuracy of the results.

# 9. Operating Days

Report the number of days when the facility was in operation during the reporting period (Form A). For the purpose of this permit, "operation" shall mean any day on which the wastewater discharged differs in strength and/or concentration from that of a domestic user.

### J. Number of Employees

Report the number of people employed during each reporting period (Form A).

# 11. Compliance Certification

Each Self-Monitoring Report requires a statement that compliance with all applicable effluent limitations has been maintained throughout the reporting period (Form A). If the permittee fails to maintain compliance, the permittee must adhere to the following requirements.

- a. The permittee must include a written report which includes a description of the cause of the noncompliance and information as to what additional operation and maintenance and/or pretreatment equipment is necessary to return to and maintain consistent compliance.
- b. The permittee is required to notify the County immediately upon becoming aware of a self-monitoring violation.
- c. The permittee shall provide, upon request by the County, any information deemed necessary by the Commissioner.
- d. The permittee must repeat sampling for all parameters exceeding applicable discharge limitations. The permittee shall submit the results of the repeat analysis within thirty (30) days of becoming aware of the violation. Note that the results of the repeat analysis may be submitted separately in order to avoid submitting a late Self-Monitoring Report.

		ب نیسولو در در در این است که دانده در در در			
		·			

Attach official calibration reports during the months of March, June, September, and December.

#### 12. Certification Statements (Form A)

- a. Each self-monitoring report must contain a statement certifying its accuracy.
- b. Each self-monitoring report must contain a statement certifying that methods for sampling and analyses conform to the methodology contained in 40 CFR Part 136 (Guidelines Establishing Test Procedures for the Analysis of Pollutants).
- c. Each self-monitoring report must contain a statement certifying that the permittee is in full compliance with all effluent limitations as stated in this permit or follow the procedures for reporting and abating non-compliant discharges as detailed in XV.B.11.
- d. In accordance with Section XVIII -- Signatory Requirements, the certification statement must be signed by the designated representative of the permitted facility.
- e. Self-monitoring reports submitted without adequate certification will not be accepted. This office will notify the permittee by teleconference or letter of the deficiency, so that it can be corrected.
- f. The self-monitoring reports due on January 30 and July 30 must contain a certification statement that the permittee is not discharging toxic organic chemicals and is adhering to an approved Toxic Organic Management Plan.

#### RECORD KEEPING

- A. Records of all information resulting from self-monitoring activities as required above, or any other discretionary self-monitoring, shall be maintained for a minimum of three (3) years. This required record keeping period may be extended during the course of unresolved litigation or by order of this department.
- B. Records shall be available for inspection and copying by the Department of Drainage and Sanitation as the Control Authority.

#### XVII. AVAILABILITY OF BUSINESS RECORDS TO DISCLOSURE

- A. The New York State Freedom of Information Law (FOIL) provides the public with access to government ecords, as do subpoenas for County records made relative to litigation. Therefore, information submitted to Onondaga County Department of Drainage and Sanitation (OCDDS) by a commercial enterprise may be subject to public disclosure unless it falls within a protected category or is otherwise nondisclosable pursuant to state or federal law.
- B. Certain business information may be considered confidential if it concerns trade secrets or information which, if disclosed, would injure the competitive position of a business. This information which is obtained by OCDDS in the course of regulating usage of the County sewer system may be protected from disclosure via FOIL requests. To do so, an assertion of confidentiality must be made at the time information is received by OCDDS using OCDDS guidelines. If no such request is made by a commercial enterprise, all information will be made available to the public by OCDDS upon receipt of a FOIL request. Guidelines for the assertion of a confidentiality claim may be obtained upon request to OCDDS.

#### XVIII. SIGNATORY REQUIREMENTS

- A. All reports and correspondence submitted by the permittee in accordance with this permit must be signed by an authorized representative. The authorized representative of the user shall be an individual who is:
  - A responsible corporate officer (if the Industrial User is a corporation). A responsible corporate
    officer may include the president, the secretary, the treasurer or vice president in charge of a
    principal business function or any other person performing a similar policy or decision making
    function.
  - 2. The manager of one or more manufacturing, production, or operation facilities employing more than 250 persons or with gross annual sales or expenditures which equal or exceed 25,000,000.00 dollars and who is duly authorized by a resolution of the corporation to submit such reports on behalf of the corporation.
- 3. A general partner or proprietor if the Industrial User is a partnership or sole proprietorship.
  - 4. A duly authorized representative of an individual described in 1 or 2 of this section if the authorization is made in writing by that individual.
- B. The permittee shall notify the Department in writing within three business days of any changes regarding the authorization to sign and certify reports submitted pursuant to this permit.

#### XIX. AUTHORIZATION

- A. This permit and the authorization to discharge industrial wastewater into the public sewer system shall e legally binding upon the permittee.
- B. This permit shall expire on August 1, 1996. The permittee shall not discharge after the date of expiration without prior written permission from this office.
- C. In order to receive a new permit and continued authorization to discharge wastewater to the public sewer system, the permittee shall have paid all industrial waste surcharges owed to the County of Onondaga and submit an up-to-date industrial waste questionnaire and other information as required by this office.
  - 1. Where a permit has been issued for a term of eighteen months or less, the permittee shall apply for renewal of that permit no later than ninety (90) days prior to the date on which the permit is scheduled to expire.
  - 2. Where a permit has been issued for a period of more than eighteen months, the permittee shall apply for renewal of that permit no later than one hundred and eighty (180) days prior to the date on which the permit is scheduled to expire.

# DEPARTMENT OF DRAINAGE AND SANITATION

650 HIAWATHA BOULEVARD, WEST SYRACUSE, NEW YORK 13204-1194 478-3755 - 425-2250

JOHN M. KARANIK COMMISSIONER

NICHOLAS J. PIRRO COLATY EXECUTIVE

#### ONONDAGA COUNTY INDUSTRIAL WASTEWATER DISCHARGE PERMIT

PERMIT NUMBER	:5	DATE ISSUED	: <u>April 15, 1989</u>
INDUSTRIAL CODE	:16	EXPIRATION DAT	TE: April 15, 1992
SIC	: <u>3647, 3321 &amp; 3365</u>		
to the Use of Department of Drouse	icle IV, Section 4.01, o the Public Sewer System rainage and Sanitation, s-Hinds Electrical Const ion of Cooper Industries	issued by the ruction Material	County of Onondaga,
	NAME OF COMP.		
is authorized b the industrial	y the Commissioner to d facility located at	lischarge indust	rial wastewater from
	lf & Seventh North Stree DRESS OF COMPANY FACILIT		
to the <u>Metropol</u>	litan Syracuse Wastewate NAME OF RECEIVING		lity
in accordance wi	ith the following condit.	ions:	

#### I. PERMITTED WASTEWATER DISCHARGE

...e permittee is authorized to discharge the following to the county sewer system:

- 1. Sanitary Wastewater
- 2. Wastewater from the electroplating process pretreated to meet the United States Environmental Protection Agency (USEPA) discharge standards for the Metal Finishing point source Category.
- 3. Wastewater originating from foundry operations (slag quench trough and rotoclones) pretreated to meet the USEPA discharge standards for the Metal Molding and Casting Point Source Category.
- 4. Non-contact cooling waters from the plastic molding and non-regulated process areas.
- 5. Runoff originating from the machining process area pretreated using a gravity Oil/Water separator.

#### II. PROHIBITED DISCHARGES

The following shall not be introduced into the county system:

- (a) Wastes which create a fire or explosion hazard in the wastewater treatment plant.
- (b) Wastes which have a pH lower than 5.5 or higher than 9.5.
- (c) Solid or viscous wastes in amounts which would cause an obstruction to the flow in sewers, or other interferences with the proper operation of the wastewater treatment plant.
- (d) Wastes at a flow rate and/or pollutant discharge rate which a excessive over relatively short time periods creating a treatment process upset and subsequent loss of treatment efficiency.
- (e) Wastes which are prohibited in Article III of the Rules Regulations.
- (f) The discharge wastewater from the 12N and 16N Rotoclones services the aluminum foundry grinding bench is prohibined under 40 CFR Part 464.15(e) from being discharged to segregated sanitary discharge (sewer #2).
- (g) The discharge wastewater from the ferrous foundry quench is prohibited. Any request for modifications of this cleank system resulting in a discharge to the sanitary system must be submitted in writing and shall be subject to approval of the Commissioner.

#### ILI. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS

The wastewater discharge of the permittee shall comply with the following effluent limitations and pretreatment standards. Section 3.08 of the Onondaga County Rules and Regulations requires the permittee to comply with USEPA pretreatment standards if they are more stringent than county effluent limitations.

(A) Onondaga County Effluent Limitations Sewer #I - The total process effluent at point of entry to the County sewer system. Sewer #2 - Sanitary discharge.

#### PARAMETERS

#### DISCHARGE LIMITATIONS

	INSTANTANEOUS (1) ALLOWABLE (mg/1)	DAILY (2) <u>ALLOWABLE (mg/l)</u>
Cadmium (Cd)	3.0	2.0
Chromium, Total (Cr)	12.0	8.0
Copper (Cu)	7.5	5.0
Cyanide, Total (CN)	3.0	2.0
Lead (Pb)	1,5	1.0
Nickel (Ni)	7.5	5.0
Silver (Ag)	1.5	1.0
Zinc (Zn)	7.5	5.0
l and Grease (O&G)	150.0	100.0
enolic Compounds	4.5	3.0

- (1) As determined by a grab sample taken of the permittee discharge at any time during the daily operational and/or production period.
- (2) As determined by a composite sample taken of the permittee daily discharge over the operational and/or production period.

#### I. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS (continued)

(B) Pretreatment standards for Existing Sources in the Metal Finishing Point Source Category - 40 CFR Part 433 Sewer #3 - Segregated effluent for the electroplating pretreatment process.

PARAMETERS	DISCHARGE LIMITATIONS	
	DAILY MAXIMUM (mg/l)	MAXIMUM 4 DAY AVERAGE (mg/l)
Cyanide, Total (CN)	1.2	0.65
Copper (Cu)	3.38	2.07
Nickel (Ni)	3.98	2.38
Chromium, Total (Cr)	2.77	1.71
Zinc (Zn)	2.6±	1.43
Lead (Pb)	0.69	0.43
Cadmium (Cd)	0.69	0.26
Silver	0.43	0.24
Total Toxic Organics (3	3) 2.13	

(3) For the Metal Finishing Pretreatment Standards, Total toxic organics is defined by the County as Control Authority to be the sum of the following pollutants.

Methylene Chloride	Tetrachloroethene
1,2 Dichloroethane	Trans 1,2 Dichloroethene
Chloroform	Carbon Tetrachloride
1,1,1 Trichloroethane	Benzene
1,1,2 Trichloroethane	Toluene
Trichloroethane	Xylenes
1,1 Dichloroethane	•

#### II. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS (continued)

Pretreatment standards for Existing Sources in the Metal (C) Molding and Casting Point Source Category - USEPA 40 CFR Part Sewer #4 - Ferrous Casting subcategory operations.

#### PARAMETERS

#### **DISCHARGE LIMITATIONS**

	(IMUM MASS BASED ONE DAY (4) LOWABLE (LBS.)	MAXIMUM MASS BASED MONTHLY AVG. (4) ALLOWABLE (LBS.)
Copper (Cu)	0.044	0.024
Lead (Pb)	0.080	0.039
Zinc (Zn)	0.148	0.056
Total Phenols	0,120	0.042
Oil and Grease-	4.536	1.512
Total Toxic Organics (TTO) (5)	0.353	0.115

- The Combined Wastestream Formula (CWF) shall be used to calculate the pretreatment standards for the foundry operations in accordance with USEPA 40 CFR Parts 403.6(e) and 464. The average pouring rate of 31.8 tons per day shall be used for the calculation of the production-based limit for the slag quench operation.
- (5) For the Metal Molding and Casting pretreatment standards, Total xic Organics (TTO) is defined by the County as the Control Authority to the sum of the following pollutants which are found at levels above the detection limit.

Methylene Chloride Tetrachloroethene 1,2-Dichloroethane Chloroform (1,1,1-Trichloroethane 1,1,2-Trichloroethane Benzene Toluene Trichloroethane Xylenes 1,1-Dichloroethane 2,4-Dichlorophenol Fluoranthene Naphthalene Phenol Bis(2-ethylhexyl)phthalate Butyl Benzyl Phthalate Di-n-butyl Phthalate Dimethyl Phthalate Chrysene Anthracene Fluorene Phenanthrene Pyrene

Trans-1,2-Dichloroethene Carbon Tetrachloride Acenaphthene 2,4-Dimethylphenol Pentachlorophenol Diethyl Phthalate 1,2-Benzanthracene Acenaphthylene

This section of the permit may be modified at any time to contain specified parameters and numeric effluent limitations due to any change in requirements of Section 307 of Public Law 92-500 or any other local, state, or federal standards. A timetable will be established in the schedule of ompliance section of this permit allowing reasonable time to comply with / modifications made to this permit.

#### - NOTICE OF NON-COMPLIANCE

In the event the permittee is unable to comply with any effluent limitation or pretreatment standard specified in this permit due to:

- (1) Breakdown of industrial waste pretreatment equipment;
- (2) Accident caused by human error or negligence, mechanical failure; or,
- (3) Other causes, such as acts of nature;

the permittee shall notify the operator of the receiving treatment plant immediately by telephone (478-3755 between the hours of 8:00 am-4:30 pm and 425-3142 or 478-4856 between the hours of 4:30 pm-8:00 am) so the necessary steps can be taken to prevent damage to the wastewater treatment process and equipment. In accordance with Article IV, Section 4.10, of the Rules and Regulations, the Commissioner shall be notified in writing within five (5) days and shall be informed of the following pertinent information:

- (1) Cause of noncompliance;
- (2) A description of the noncomplying discharge;
- (3) Anticipated time the condition of noncompliance is expected to continue, or if such condition has been corrected, the duration of the period of noncompliance;
- (4) Steps taken by the permittee to reduce and eliminate the noncomplying discharge; and,
- (5) Steps to be taken by the permittee to prevent recurrence of the condition of noncompliance.

Nothing in this permit shall be construed to relieve the permittee from the penalties for noncompliance with this permit pursuant to Article VII-Enforcement and Penalties of the Rules and Regulations Relating to the Use of the Public Sewer System.

#### V. CHANGE IN WASTEWATER DISCHARGE

All discharges authorized herein shall comply with the terms and conditions of this permit. Any industrial facility expansions, production increases or process modifications which result in new, different or increased discharges of pollutants must be reported by submission of a new industrial waste disposal questionnaire pursuant to Article IV, Section 4.02, of the Rules and Regulations. This permit may be modified to specify and limit any pollutants not previously limited. The discharges of any pollutant more frequently than, or at a level in excess of that specified and authorized by this permit, shall constitute a violation of the terms and conditions of this permit.

#### T. COUNTY MONITORING

The monitoring of each industrial discharge and the recording of quantitative values shall be performed by authorized employees or representatives of the county according to schedules established by the Commissioner. Composite samples will be collected whenever possible over the production day including clean-up periods. The flow (in gallons per day) shall be measured during each sampling period. If flow measurement is not practicable, water use records may be substituted in place of flow measurement.

Additional sampling and flow measurement may be performed by the permittee using approved methods. The data obtained by the permittee may be used at the discretion of the Commissioner as supplemental data to show compliance with permit effluent limitations and pretreatment standards or to be used in addition to county data for computations of the Industrial Waste Surcharge.

All analyses shall be performed in accordance with, approved USEPA analytical methods (40 CFR 136) as stated in the latest edition of the following references:

STANDARD METHODS FOR THE EXAMINATION OF WATER AND WASTEWATER, 16th Edition, 1985, American Public Health Association, New York, New York 10019.

METHODS FOR CHEMICAL ANALYSIS OF WATER AND WASTES, Environmental Monitoring and Support Laboratory, Office of Research and Development, March 1983, Environmental Protection Agency, Cincinnati, Ohio 45268.

# VI. COUNTY MONITORING (continued)

he sampling schedule cited below shall become effective the day this permit is issued.

DISCHARGE LOCATION_	PARAMETERS -	MINIMUM FREQUENCY OF ANALYSIS	TYPE OF SAMPLE
Sewer #1 Total Plant	Biochemical Oxygen Demand (BOD)	16 times/year	Composite

*TTO is comprised of a discrete list of toxic organic pollutants for each process segment where it is regulated. Section III, Articles B and C, contains the list of toxic organic pollutants for 40 CFR Parts 433 and 464 regulations, respectively (see footnotes (3) and (5)).

#### VII. PERMIT MODIFICATIONS

ter sufficient notice to the permittee, this permit may be modified, suspended, or revoked in whole or part during its term for causes including, but not limited to, the following:

- (a) Violation of any terms or conditions of this permit.
  - (b) A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.
  - (c) A toxic effluent standard being established under any state or federal law for a toxic pollutant which is present in the discharge and such standard or prohibition is more stringent than any limitation for such pollutant in this permit.
  - (d) Failure to make payments of the Industrial Waste Surcharge.

#### VIII. RIGHT OF ENTRY

The permittee shall allow duly authorized employees or representatives of the county to enter the permittee's premises for the purpose of inspection, observation, flow measurement, sampling and testing in accordance with Article IV, Section 4.08, of the Rules and Regulations.

#### IX. TRANSFER OF OWNERSHIP CONTROL

the event of any change in the ownership of the Industrial Facilities from which the authorized discharges emanate, the permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Commissioner.

#### X. PRETREATMENT FACILITIES

The permittee shall provide and maintain, at its expense, pretreatment of industrial wastewaters when required by the Commissioner pursuant to Article IV, Section 4.09, of the Rules and Regulations. All reports, plans and/or specifications for new or modified pretreatment facilities or changes in method of operation must be approved by the Commissioner or his designee.

#### "T. WASTE MATERIAL DISPOSAL

Any screening, sludge, solids, waste oils, or other waste materials removed or separated from the permittee's authorized discharge shall be disposed of in such a manner as to prevent entry of such materials into navigable waters or into the wastewater treatment system. Upon the request of the Commissioner, the following data regarding the disposal of pretreatment process sludge shall be reported to the County of Onondaga:

- (a) The source of materials to be disposed of.
- (b) The approximate volumes and weights.
- (c) The method by which they were removed and transported.
- (d) The company contracted to remove such materials.
- (e) The final disposal or recovery location.

#### XII. MONITORING FACILITIES

If, in the opinion of the Commissioner, there are inadequate provisions for the collection of representative samples and accurate flow measurements, the Commissioner can require, in accordance with Article IV, Section 4.07, of the Rules and Regulations, that a monitoring facility consisting of a sampling manhole with a flow measuring device be installed by the permittee its expense. This monitoring facility shall be approved by the ammissioner before installation. The permittee shall be responsible for all maintenance of the sampling manhole and calibration of the monitoring equipment.

#### XIII. SCHEDULE OF COMPLIANCE

The permittee shall comply with the following schedule:

- 1) By March 30, 1989 the permittee must provide a monitoring location for the segregated foundry discharge (Sewer #4).
- 2) By March 30, 1989 the permittee shall evaluate treatment alternatives for the unregulated fan cooling water discharge to reduce zinc loading to the collection system.
- 3) By April 1, 1989 the permittee must submit the 90-day compliance report. This report must outline the operational and maintenance changes required to reduce pollutant loadings to comply with effluent limitations pursuant to Section III of this permit. This report shall fulfill the first quarter monitoring requirements as detailed in Section XV of this permit.
- 4) By June 1, 1989 the permittee must install a permanent continuous recording flow monitoring station for the total plant process outfall (sewer #1).

#### XIII. SCHEDULE OF COMPLIANCE (continued)

- 5) By June 1, 1989 the permittee must install a clock to record run time for pumps discharging flow to sewer #4. A multiplying factor shall be made available upon request of an authorized county representative. This data will be used to determine flow rates for the Sewer #4 discharge.
- By December 31, 1989 the permittee must eliminate the entry of storm water runoff from Wolf Street to the Crouse-Hinds facility. The December 31 self-monitoring report shall address actions taken to meet this compliance requirement. In addition, the report shall include an estimate of the volume of storm water originating from the plant grounds and discharged to the sanitary sewer.

Failure to meet these compliance dates may result in this office proceeding with the legal action necessary to ensure compliance including the assessment of the fines and penalties prescribed under Article VII of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System.

#### XIV. COMPUTATION AND PAYMENTS OF INDUSTRIAL WASTE SURCHARGE

The permittee shall pay its proportionate share of the cost of operation and maintenance and local debt retirement of the treatment system.

ese charges shall be computed by the Commissioner using the formulae in litticle V, Section 5.02, of the Onondaga County Rules and Regulations.

Payments shall be made to the County of Onondaga by the permittee no less often than annually.

If there is a substantial change in the wastewater characteristics and/or flow rate introduced into the County Treatment Plant by the permittee, the industrial surcharge shall be adjusted accordingly.

# XV. PERMITTEE SELF-MONITORING AND REPORTING REQUIREMENTS

accordance with 40 CFR 403.12(e), the permittlee shall submit a quarterly self-monitoring Periodic Report by March 31, June 30, September 30 and December 31 of each year. The permittee is subject to both the Electroplating and Metal Finishing Pretreatment Standards (40 CFR Part 433) and the Metal Molding and Casting Pretreatment Standards (40 CFR Part 464). Failure to submit a self-monitoring Periodic Report is a violation of this permit. The Periodic Report shall comply with and include the following:

- A listing of the nature and concentration of all regulated pollutants in the facility's regulated process waste streams.
  - a. The sampling schedule cited below shall become effective the day this permit is issued.

DISCHARGE LOCATION	<u>PARAMETERS</u>	MINIMUM FREQUENCY OF ANALYSIS	TYPE OF SAMPLE
Sewer #1 (Total Plant	Biochemical Oxygen Demand (BOD)	3 times/quarter	Composite
Process Outfall)	Total Suspended Solids (TSS)	3 times/quarter	Composite

#### XV. PERMITTEE SELF-MONITORING AND REPORTING REQUIREMENTS (continued)

Sewer #4	Cu	3	times/quarter	Composite
(Segregated	Pb	. 3	times/quarter	Composite
Ferrous Molding	Zn	3	times/quarter	Composite
and Casting	Total Phenols	3	times/quarter	Grab
Effluent)	*TTO	1	time/quarter	Grab

*TTO is comprised of a discrete list of toxic organic pollutants for each process segment where it is regulated. Section III, Articles B and C, contains the list of toxic organic pollutants for 40 CFR Parts 433 and 464 regulations, respectively (see footnotes (3) and (5)). TTO reporting for Sewer #1 shall include the sum of the organic pollutants required by the Metal Finishing Point Source Category (40 CFR Part 433), listed under footnote (3).

- b. The sampling and analytical data submitted shall consist of self-monitoring data for the regulated process waste stream.
- c. Samples shall be collected for three (3) consecutive days typical of normal production.
- d. Samples shall be collected in accordance with the methods outlined in the regulations. Note that the sample interval for composite samples must not exceed a frequency of one sample every thirty (30) minutes.
- e. All analyses must be performed by a NYSDOH certified laboratory.

For sewer #1 and sewer #2, a summary of the daily amount of water discharged to the county sewer system. List the daily amount discharged through each connection to the sanitary sewer system.

- For sewer #3 and sewer #4, the total daily flow and daily maximum flow rate for each regulated process waste streams during each day of the sampling period.
  - 4. A summary of the results of quarterly equipment calibration checks for the flow metering/recording device for each regulated process wastestream.
  - A summary of the methods used by the permittee to sample and analyze the data and a certification that these methods conform to the outlined in the regulations.
  - 5. By July 31 of each year, the permittee must submit the annual USEPA Toxic Chemical Release Inventory Reporting Form R.
  - 7. The total number of days when the plant was in full operation throughout the reporting period.
  - 8. The total number of people employed throughout each reporting period.
  - A statement certifying that the iron foundry metal pouring rate was within plus or minus twenty percent of 31.8 tons per day throughout the reporting period.

## XV. PERMITTEE SELF-MONITORING AND REPORTING REQUIREMENTS (continued)

- A statement that compliance with all applicable standards is consistently achieved. If compliance is not consistently achieved, the report must include a statement as to what additional operation and maintenance and/or pretreatment equipment is necessary to achieve compliance.
- 11. Section 403.12(g) of the USEPA General Pretreatment Regulations (40 CFR Part 403) promulgated in final form on October 17,1988 requires the permittee to notify the Commissioner within 24 hours of becoming aware of a self-monitoring violation. The permittee must also repeat the sampling for all parameters exceeding applicable discharge limitations and submit the results of the repeat analysis within thirty (30) days of becoming aware of the violation. In the event that the County samples the discharge location at least once per month or the County samples between permittee self-monitoring and receipt of initial results, the permittee is not required to resample. Note that the results of the repeat analysis may be submitted separately in order to avoid late periodic reporting.
- 12. The report must include data on sampling and analysis for the toxic organic compounds listed in the federal regulations.
- 13. The report must be signed by an authorized representative of the permittee.

#### I. RECORD KEEPING

Records of all information resulting from self-monitoring activities shall be maintained for a minimum of three (3) years in accordance with 40 CFR 403.12(n). These records shall be available for inspection and copying by the Department of Drainage and Sanitation as the Control Authority.

#### XVII. AUTHORIZATION AND AGREEMENT

nis permit and the authorization to discharge industrial wastewater into the public sewer system shall be legally binding upon the permittee. This permit shall expire three (3) years from the date of issuance. The permittee shall not discharge after the date of expiration. In order to receive a new permit and continued authorization to discharge wastewater to the public sewer system beyond the date of expiration, the permittee shall have paid all industrial waste surcharges owed to the County of Onondaga and submit an up-to-date industrial waste questionnaire and other information as required by the Commissioner no later than 120 days prior to the expiration date.

# ONONDAGA COUNTY INDUSTRIAL WASTEWATER DISCHARGE PERMIT

PERMIT NUMBER : 5	· · · · · · · · · · · · · · · · · · ·	DATE ISSUED	:February 1, 1988
INDUSTRIAL CODE: 16		EXPIRATION DAT	E:February 1, 1989
sic : 364	7		
Pursuant to Article IV, to the Use of the Publi Department of Drainage a Crouse Hinds C	lc Sewer System	issued by the al Construction	County of Onondage
is authorized by the Cor the industrial facility	located at	•	
Wolf & Seve	nth North Street	. Svracuse. New	w Vork
ADDRESS OF	COMPANY FACILITY	DISCHARGING WA	STEWATER
to the <u>Metropolitan Syra</u>		Treatment Faci	
in accordance with the fo	ollowing condition	vnc •	

#### I. PERMITTED WASTEWATER DISCHARGE

The permittee is authorized to discharge the following to the county sewer system:

- 1. Sanitary Wastewater
- 2. The effluent from the electroplating process pretreated to meet the United States Environmental Protection Agency (USEPA) 40 CFR Part 433 standards.
- 3. Non-contact cooling waters from the plastic molding and other regulated process areas.
- 4. Wastewater originating as machining process area runoff pretreated using gravity Oil/Water separator.
- 5. Wastewaster originating from foundry operations (slag quench trough and rotoclones) pretreated to meet the USEPA 40 CFR Part 464 standards.

#### II. PROHIBITED DISCHARGES

The following shall not be introduced into the county system:

- (a) Wastes which create a fire or explosion hazard in the wastewater treatment plant.
- (b) Wastes which have a pH lower than 5.5 or higher than 9.5.
- (c) Solid or viscous wastes in amounts which would cause an obstruction to the flow in sewers, or other interferences with the proper operation of the wastewater treatment plant.
- (d) Wastes at a flow rate and/or pollutant discharge rate which is excessive over relatively short time periods creating a treatment process upset and subsequent loss of treatment efficiency.
- (e) Wastes which are prohibited in Article III of the Rules and Regulations.
- (f) Wastewater from the 12N and 16N Rotoclones that services the aluminum foundry grinding bench which is prohibited under 40 CFR Part 464.15(e) from being discharged to the segregated sanitary discharge (sewer #2).
- (g) Wastewater from the ferrous foundry APC cupola drag tank and quench tank is prohibited. Any request for modifications of this closed tank system resulting in the discharge to the sanitary sewer system must be submitted in writing and shall be subject to the approval of the Commissioner.

#### III. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS

The wastewater discharge of the permittee shall comply with the following effluent limitations and pretreatment standards. Section 3.08 of the Onondaga County Rules and Regulations requires the permittee to comply with USEPA pretreatment standards if they are <u>more stringent</u> than county effluent limitations.

(A) Sewer #1 - Onondaga County Effluent Limitations for the total process effluent at point of entry to the County sewer system.

#### **PARAMETERS**

#### DISCHARGE LIMITATIONS

	INSTANTANEOUS (1) ALLOWABLE (mg/l)	DAILY (2) ALLOWABLE (mg/l)
Cadmium (Cd)	2.0	3.0
Chromium, Total (Cr)	8.0	12.0
Copper (Cu)	5.0	7.5
Cyanide, Total (CN)	2.0	3.0
Lead (Pb)	1.0	1.5
Nickel (Ni)	5.0	7.5
Silver (Ag)	1.0	1.5
Zinc (Zn)	5.0	7.5
Oil and Grease (O&G)	150.0	100.0
Phenolic Compounds	4.5	3.0

- (1) As determined by a grab sample taken of the permittee discharge at any time during the daily operational and/or production period.
- (2) As determined by a composite sample taken of the permittee daily discharge over the operational and/or production period.

#### III. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS (continued)

(B) Sewer #1 - Metal Molding and Casting Pretreatment Standards-USEPA 40 CFR Part 464 (Aluminum and Ferrous Casting Subcategories)

#### PARAMETERS

#### DISCHARGE LIMITATIONS

	MAXIMUM MASS BASED ONE DAY MONTHLY AVG. ALLOWABLE (LBS.)	MAXIMUM CONCENTRATION ONE DAY MONTHLY AVG. ALLOWABLE (mg/l)
Copper (Cu) Lead (Pb) Zinc (Zn) Total Phenols Oil and Grease Total Toxic Organics	(3) (3) (3) (3) (3) (TTO) (4)	(3) (3) (3) (3) (3) (4)

- (3) The discharge limitations set forth under the Metal Molding and Casting Pretreatment Standards (USEPA 40 CFR Part 464) are reserved pending submission of the Baseline Monitoring Report. Upon submission of the report, an evaluation shall be made by this office and this section of the permit shall be modified to include the mass based and equivalent concentration based limits. The pretreatment standards dictated by USEPA 40 CFR Part 464 shall be applied to the total plant effluent (sewer #1) in those cases where they are more stringent than the County standards. The Combined Wastestream Formula (CWF) shall be used to calculate the pretreatment standards for the foundry operations in accordance with USEPA 40 CFR Parts 403.6(e) and 464.
- (4) For the Metal Molding and Casting pretreatment standards, Total Toxic Organics (TTO) is defined by the County as the Control Authority to be the sum of the following pollutants which are found at levels above the detection limit.

Methylene Chloride
1,2 Dichloroethane
Chloroform
1,1,1 Trichloroethane
1,1,2 Trichloroethane
Trichloroethylene
acenaphthene
2,4-dimethylphenol
pentachlorophenol
phenol

fluoranthene
naphthalene
bis(2-ethylhexyl)phthalate
di-n-butyl phthalate
dimethyl phthalate
chrysene
anthracene
phenanthrene

#### III. EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS (continued)

(C) Sewer #3 - Metal Finishing Pretreatment Standards - Part 433 Segregated effluent for the electroplating pretreatment process.

<u>PARAMETERS</u>	<b>DISCHARGE LIMITATIONS</b>			
	DAILY MAXIMUM (mg/l)	MAXIMUM 4 DAY AVERAGE (mg/l)		
Cyanide, Total (CN)	1.2	0.65		
Copper (Cu)	3.38	2.07		
Nickel (Ni)	3.98	2.38		
Chromium, Total (Cr)	2.77	1.71		
Zinc (Zn)	2.61	1.48		
Lead (Pb)	0.69	0.43		
Cadmium (Cd)	0.69	0.26		
Silver	0.43	0.24		
Total Toxic Organics	(5) 2.13			

(5) For the Metal Finishing Pretreatment Standards, Total toxic organics is defined by the County as Control Authority to be the sum of the following pollutants.

Methylene Chloride	Tetrachloroethylene
1,2 Dichloroethane	Freon
Chloroform 1,1,1 Trichloroethane 1,1,2 Trichloroethane Trichloroethylene	Carbon Tetrachloride Benzene Toluene Xylenes

(D) Sewer #2 - Sanitary wastewater - The local limitations are detailed in Article III of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System.

This section of the permit may be modified at any time to contain specified parameters and numeric effluent limitations due to any change in requirements of Section 307 of Public Law 92-500 or any other local, state, or federal standards. A timetable will be established in the schedule of compliance section of this permit allowing reasonable time to comply with any modifications made to this permit.

#### IV. NOTICE OF NON-COMPLIANCE

In the event the permittee is unable to comply with any effluent limitation or pretreatment standard specified in this permit due to:

- (1) Breakdown of industrial waste pretreatment equipment;
- (2) Accident caused by human error or negligence, mechanical failure; or,
- (3) Other causes, such as acts of nature;

the permittee shall notify the operator of the receiving treatment plant immediately by telephone (478-3755 between the hours of 8:00 am-4:30 pm and 425-3142 or 478-4856 between the hours of 4:30 pm-8:00 am) so the necessary steps can be taken to prevent damage to the wastewater treatment process and equipment. In accordance with Article IV, Section 4.10, of the Rules and Regulations, the Commissioner shall be notified in writing within five (5) days and shall be informed of the following pertinent information:

- (1) Cause of noncompliance;
- (2) A description of the noncomplying discharge;
- (3) Anticipated time the condition of noncompliance is expected to continue, or if such condition has been corrected, the duration of the period of noncompliance;
- (4) Steps taken by the permittee to reduce and eliminate the noncomplying discharge; and,
- (5) Steps to be taken by the permittee to prevent recurrence of the condition of noncompliance.

Nothing in this permit shall be construed to relieve the permittee from the penalties for noncompliance with this permit pursuant to Article VII-Enforcement and Penalties of the Rules and Regulations Relating to the Use of the Public Sewer System.

# V. CHANGE IN WASTEWATER DISCHARGE

All discharges authorized herein shall comply with the terms and conditions of this permit. Any industrial facility expansions, production increases or process modifications which result in new, different or increased discharges of pollutants must be reported by submission of a new industrial waste disposal questionnaire pursuant to Article IV, Section 4.02, of the Rules and Regulations. This permit may be modified to specify and limit any pollutants not previously limited. The discharges of any pollutant more frequently than, or at a level in excess of that specified and authorized by this permit, shall constitute a violation of the terms and conditions of this permit.

#### VI. COUNTY MONITORING

The monitoring of each industrial discharge and the recording of quantitative values shall be performed by authorized employees or representatives of the county according to schedules established by the Commissioner. Composite samples will be collected whenever possible over the production day including clean-up periods. The flow (in gallons per day) shall be measured during each sampling period. If flow measurement is not practicable, water use records may be substituted in place of flow measurement.

Additional sampling and flow measurement may be performed by the permittee using approved methods. The data obtained by the permittee may be used at the discretion of the Commissioner as supplemental data to show compliance with permit effluent limitations and pretreatment standards or to be used in addition to county data for computations of the Industrial Waste Surcharge.

All analyses shall be performed in accordance with, approved USEPA analytical methods (40 CFR 136) as stated in the latest edition of the following references:

STANDARD METHODS FOR THE EXAMINATION OF WATER AND WASTEWATER, 16th Edition, 1985, American Public Health Association, New York, New York 10019.

METHODS FOR CHEMICAL ANALYSIS OF WATER AND WASTES, Environmental Monitoring and Support Laboratory, Office of Research and Development, March 1983, Environmental Protection Agency, Cincinnati, Ohio 45268.

## VI. COUNTY MONITORING (continued)

The sampling schedule cited below shall become effective the day this permit is issued.

*TTO is comprised of a discrete list of toxic organic pollutants for each process segment where it is regulated. Section III, Articles B and C, contains the list of toxic organic pollutants for 40 CFR Parts 464 and 433 regulations, respectively (see footnotes (4) and (5)).

#### VII. PERMIT MODIFICATIONS

After sufficient notice to the permittee, this permit may be modified, suspended, or revoked in whole or part during its term for causes including, but not limited to, the following:

- (a) Violation of any terms or conditions of this permit.
- (b) A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.
- (c) A toxic effluent standard being established under any state or federal law for a toxic pollutant which is present in the discharge and such standard or prohibition is more stringent than any limitation for such pollutant in this permit.
- (d) Failure to make payments of the Industrial Waste Surcharge.

#### VIII. RIGHT OF ENTRY

The permittee shall allow duly authorized employees or representatives of the county to enter the permittee's premises for the purpose of inspection, observation, flow measurement, sampling and testing in accordance with Article IV, Section 4.08, of the Rules and Regulations.

#### IX. TRANSFER OF OWNERSHIP CONTROL

In the event of any change in the ownership of the Industrial Facilities from which the authorized discharges emanate, the permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Commissioner.

#### X. PRETREATMENT FACILITIES

The permittee shall provide and maintain, at its expense, pretreatment of industrial wastewaters when required by the Commissioner pursuant to Article IV, Section 4.09, of the Rules and Regulations. All reports, plans and/or specifications for new or modified pretreatment facilities or changes in method of operation must be approved by the Commissioner or his designee.

#### XI. WASTE MATERIAL DISPOSAL

Any screening, sludge, solids, waste oils, or other waste materials removed or separated from the permittee's authorized discharge shall be disposed of in such a manner as to prevent entry of such materials into navigable waters or into the wastewater treatment system. During the months of June and December of each year the following data regarding the disposal of pretreatment process sludge shall be reported to the County of Onondaga:

- (a) The source of materials to be disposed of.
- (b) The approximate volumes and weights.
- (c) The method by which they were removed and transported.
- (d) The company contracted to remove such materials.
- (e) The final disposal or recovery location.

#### XII. MONITORING FACILITIES

If, in the opinion of the Commissioner, there are inadequate provisions for the collection of representative samples and accurate flow measurements, the Commissioner can require, in accordance with Article IV, Section 4.07, of the Rules and Regulations, that a monitoring facility consisting of a sampling manhole with a flow measuring device be installed by the permittee at its expense. This monitoring facility shall be approved by the Commissioner before installation. The permittee shall be responsible for all maintenance of the sampling manhole and calibration of the monitoring equipment.

### XIII. SCHEDULE OF COMPLIANCE

The permittee shall comply with the following schedule:

- 1) By February 15, 1988 all design changes to the LICON, INC. vacuum evaporator recovery system serving the zinc plating operation must be completed.
- 2) By March 1, 1988 the zinc plating process effluent must be in compliance with the Metal Finishing Standards (40 CFR Part 433).
- 3) By August 1,1988 the permittee must install a permanent continuous recording flow monitoring station for the total plant process outfall (sewer #1). Since this plant discharges collected stormwater in addition process wastewater, this flow data will be used to compute the annual sanitary district unit charge and the industrial wastewater surcharge.
- 4) By August 1, 1988 the permittee must initiate a sampling program designed to address all pertinent information necessary to complete the Baseline Monitoring Report (BMR) for industries in the Metal Molding and Casting point source category (40 CFF Part 464).

#### VIII. SCHEDULE OF COMPLIANCE (continued)

- 5) By October 1, 1988 the permittee must submit a completed BMR for the wastewater discharges subject to the standards for the Metal Molding and Casting point source category (40 CFR Part 464).
- 6) By February 1, 1989 the permittee must submit the 90 day Compliance Report for industries subject to the Metal Molding and Casting Pretreatment Standards (40 CFR Part 464).

Failure to meet these compliance dates may result in this office proceeding with the legal action necessary to ensure compliance including the assessment of the fines and penalties proscribed under Article VII of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System.

# XIV. COMPUTATION AND PAYMENTS OF INDUSTRIAL WASTE SURCHARGE

The permittee shall pay its proportionate share of the cost of operation and maintenance and local debt retirement of the treatment system.

These charges shall be computed by the Commissioner using the formulae in Article V, Section 5.02, of the Onondaga County Rules and Regulations.

Payments shall be made to the County of Onondaga by the permittee no less often than annually.

If there is a substantial change in the wastewater characteristics and/or flow rate introduced into the County Treatment Plant by the permittee, the industrial surcharge shall be adjusted accordingly.

#### XV. PERMITTEE SELF-MONITORING AND REPORTING REQUIREMENTS

In accordance with 40 CFR 403.12(e), the permittee shall submit a quarterly self-monitoring Periodic Report during the months of March, June, September and December of each year. The permittee is subject to both the Electroplating and Metal Finishing Pretreatment Standards (40 CFR Part 433) and the Metal Molding and Casting Pretreatment Standards (40 CFR Part 464). Failure to submit a self-monitoring Periodic Report is a violation of this permit. The Periodic Report shall comply with and include the following:

- 1. A listing of the nature and concentration of all regulated pollutants in the facility's regulated process waste streams.
  - a. Each sample must be analyzed for all regulated pollutants detailed under Section III on pages 3, 4 and 5 of this permit.
  - b. The sampling and analytical data submitted shall consist of self-monitoring data for the regulated process waste stream.
  - c. Samples shall be collected for three (3) consecutive days typical of normal production.
  - d. Samples shall be collected in accordance with the methods outlined in the regulations. Note that the sample interval for composite samples must not exceed a frequency of one sample every thirty (30) minutes.
  - e. All analyses must be performed by a NYSDOH certified laboratory.
- 2. A summary of the daily flow rates for the regulated process waste streams including both the daily average and daily maximum flow rate for each three day sampling period.
- 3. A summary of the results of quarterly equipment calibration checks for the flow metering/recording device for each regulated process wastestream.
- 4. A summary of the methods used by the permittee to sample and analyze the data and a certification that these methods conform to the outlined in the regulations.
- 5. A statement that compliance with all applicable standards is consistently achieved. If compliance is not consistently achieved, the report must include a statement as to what additional operation and maintenance and/or pretreatment equipment is necessary to achieve compliance.
- 6. The report must include data on sampling and analysis for the toxic organic compounds listed in the federal regulations.
- 7. All reports submitted after August 1, 1988 must include a listing of the daily flow values for sewer #1 recorded by the permanently installed instrumentation required under Section VIII of this permit.
- 8. The report must be signed by an authorized representative of the permittee.

#### XVI. RECORD KEEPING

Records of all information resulting from self-monitoring activities shall be maintained for a minimum of three (3) years in accordance with 40 CFR 403.12(n). These records shall be available for inspection and copying by the Department of Drainage and Sanitation as the Control Authority.

#### XVII. OTHER REQUIREMENTS

During 1988, the Commissioner shall make a determination as to whether stormwater run off from this facility site will be continued to be accepted into the County's sanitary sewer system.

#### XVIII. AUTHORIZATION AND AGREEMENT

This permit and the authorization to discharge industrial wastewater into the public sewer system shall be legally binding upon the permittee. This permit shall expire one (1) year from the date of issuance. The permittee shall not discharge after the date of expiration. In order to receive a new permit and continued authorization to discharge wastewater to the public sewer system beyond the date of expiration, the permittee shall have paid all industrial waste surcharges owed to the County of Onondaga and submit an up-to-date industrial waste questionnaire and other information as required by the Commissioner no later than 120 days prior to the expiration date.

Mr. Jim Burke Crouse-Hinds Company Wolf & Seventh North Streets Syracuse, NY 13201

Dear Jim:

Enclosed please find a copy of the Industrial Waste Discharge Permit, number 5, for Crouse-Hinds Company.

This permit is in effect as of the date issued. Any requests for changes to this permit should be submitted to this office in writing and are subject to the approval of the Commissioner.

As provided in the Monitoring and Recording Section of this permit, we will periodically monitor your discharge to insure compliance with permit effluent limitations.

Please be advised that any violation of the terms or conditions of the enclosed permit may subject you to the penalties for violations as provided by the Onon-daga County Rules and Regulations Relating to the Use of the Public Sewer System.

If you have any questions, please do not hesitate to contact this office.

Very truly yours,

to the Metropoli	tan Syracuse Was	stewater Tr	eatment Fa	cilit	. <b>y</b>		
	NAME OF RE	CEIVING TRE	ATMENT PL	ANT			
in accordance with th	ne following con	ditions:					
*The industrial wa consist of only t	stewater dischar he following:	rged from C	rouse-Hind	ls Fac	ility sha	11	
1. Sanitary Waste	water						
2. Plating Wastew	ater Treatment 9	Systom Effl					

3. Gravity Oil/Water Separator Effluent

4. Clarified Foundry Process Water

5. Contact Cooling Water

#### EFFLUENT LIMITATIONS

The wastewater discharge of the permittee shall be limited as specified below:

		DISCHARGE	LIMITATIONS
DISCHARGE LOCATION	PARAMETERS	DAILY	MAXIMUM
Sewer #1	Total Chromium (Cr)	10	mg/1
	Cyanide (Cn)	2	mg/l
	Nickel (Ni)	10	mg/l
	Zine (Zn)	5	mg/l
	Oil & Grease (O&G)	100	mg/l

No other special effluent limitations are required at this time other than those contained in the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System. If your wastewater discharge exceeds those limitations specified in the Rules and Regulations or the effluent limitations change due to requirements of Section 307 of Public Law 92-500 or any other local, state, or federal requirement, this section of the permit will be modified to contain other specified parameters and numeric limitations. A timetable will be established in the schedule of compliance section of this permit allowing reasonable time to comply with modifications made to this permit.

The following waste shall not be introduced into the wastewater treatment system:

- (a) Wastes which create a fire or explosion hazard in the wastewater treatment plant.
- (b) Wastes which have a pH lower than 5.5 or higher than 9.0.
- (c) Solid or viscous wastes in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the wastewater treatment plant.
- (d) Wastes at a flow rate and/or pollutant discharge rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.
- (e) Wastes which are prohibited in Article III of the Rules and Regulations Relating to the Use of the Public Sewer System.

#### MONITORING AND RECORDING

The monitoring of each industrial discharge and the recording of quantitative values shall be performed by authorized employees or representatives of the County according to schedules established by the Projects Engineer. Composite samples will be collected whenever possible and composited over the

production day including clean-up periods. The flow (in gallons per day) shall be measured during each sampling period. If flow measurement is not practicable, water use record may be substituted in place of flow measurement.

Additional sampling and flow measurement may be performed by the permittee using approved methods. The data obtained by the permittee may be used at the discretion of the Commissioner as supplemental data to show compliance with permit effluent limitations or to be used in addition to County data for computation of the Industrial Waste Surcharge.

The sampling schedule cited below shall become effective the day this permit is issued.

DISCHARGE LOCATION	PARAMETERS	MINIMUM FREQUENCY OF ANALYSIS	TYPE OF SAMPLE
Sewer #1	Biochemical Oxygen Demand (BOD)	12 times/year	Composite
	Total Suspended Solids (TSS	) 12 times/year	Composite
	Total Phosphorus (TP)	12 times/year	Composite
	Н	12 times/year	Composite
	Total Chromium (Cr)	12 times/year	Composite
	Cyanide (Cn)	12 times/year	Composite
	Nickel (Ni)	12 times/year	Composite
	Zinc (Zn)	12 times/year	Composite
	Oil & Grease (O&G)	12 times/year	Grab
Sewer #2	Biochemical Oxygen Demand (BOD)	2 times/year	Grab
	Total Suspended Solids (TSS	) 2 times/year	Grab
	Total Phosphorus (TP)	2 times/year	Grab
	pH	2 times/year	Grab

Note: The sampling and analysis as scheduled above will be performed by the Department of Drainage and Sanitation sampling crews. Additional sampling and analysis may be conducted by the permittee at its' own expense.

All analyses shall be performed in accordance with the latest edition of the following references:

STANDARD METHODS FOR THE EXAMINATION OF WATER AND WASTEWATERS, 13th Edition, 1971 American Public Health Association, New York, New York 10019.

W.Q.O. METHODS FOR CHEMICAL ANALYSIS OF WATER AND WASTES, April, 1971, Environmental Protection Agency, Water Quality Office, Analytical Quality Control Laboratory, NERC, 1014 Broadway, Cincinnati, Ohio 45268.

#### NOTICE OF NON-COMPLIANCE

In the event the permittee does not comply with or will be unable to comply with any daily maximum effluent limitation specified in this permit due to:

- (1) Breakdown of Industrial Waste Pretreatment Equipment.
- (2) Accidents caused by human error or negligence; or

(3) Other causes, such as acts of nature.

The permittee shall notify the operator of the receiving treatment plant immediately by telephone so that the operator can take the necessary steps to prevent damage to the wastewater treatment process and equipment. The Projects Engineer shall be notified in writing within five (5) days and shall include the following pertinent information:

- (1) Cause of noncompliance.
- (2) A description of the noncomplying discharge.
- (3) Anticipated time the condition of noncompliance is expected to continue, or if such condition has been corrected, the duration of the period of noncompliance.
- (4) Steps taken by the permittee to reduce and eliminate the non-complying discharge; and
- (5) Steps to be taken by the permittee to prevent recurrence of the condition of noncompliance.

Nothing in this permit shall be construed to relieve the permittee from the penalties for noncompliance of this permit for any reason subject to Article V - Penalties for Violations of the Rules and Regulations Relating to the Use of the Public Sewer System.

#### CHANGE IN WASTEWATER DISCHARGE

All discharges authorized herein shall comply with the terms and conditions of this permit. Any industrial facility expansions, production increases or process modifications which result in new, different or increased discharges of pollutants must be reported by submission of a new industrial waste disposal questionnaire pursuant to Article IV Section 4.2 of the Rules and Regulations Relating to the Use of the Public Sewer System. This permit may be modified to specify and limit any pollutants not previously limited. The discharges of any pollutant more frequently than or at a level in excess of that specified and authorized by this permit shall constitute a violation of the terms and conditions of this permit.

#### PERMIT MODIFICATIONS

After sufficient notice to the permittee, this permit may be modified, suspended, or revoked in whole or in part during its term for cause including, but not limited to, the following:

- (a) Violation of any terms or conditions of this permit.
- (b) A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.

- (c) If a toxic effluent standard is established under any State or Federal law for toxic pollutant which is present in the discharge and such standard or prohibition is more stringent than any limitation for such pollutant in this permit.
- (d) Failure to make payments of the Industrial Waste Surcharge.

#### RIGHT OF ENTRY

The permittee shall allow duly authorized employees or representatives of the County to enter the permittee's premises for the purpose of inspection, observation, measurement, sampling, and testing in accordance with Article III Section 3.19 (a) of the Rules and Regulations Relating to the Use of the Public Sewer System.

#### TRANSFER OF OWNERSHIP CONTROL

In the event of any change in the control of ownership of the Industrial Facilities from which the authorized discharges emanate, the permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Commissioner.

#### PRETREATMENT FACILITIES

The permittee shall provide, at his expense, pretreatment of industrial wastewaters when required by the Commissioner pursuant to Article III Section 3.14 of the Rules and Regulations Relating to the Use of the Public Sewer System. All reports, plans and/or specifications for new or modified pretreatment facilities must be approved by the Commissioner or his designee.

The permittee shall at all times maintain pretreatment facilities in accordance with Article III Section 3.18 of the Rules and Regulations Relating to the Use of the Public Sewer System.

#### WASTE MATERIAL DISPOSAL

Any screenings, sludges, solids, waste oils, or other waste materials removed or separated from the permittee's authorized discharge shall be disposed in such a manner as to prevent entry of such materials into navigable waters or into the wastewater treatment system. The following data shall be reported to the County of Onondaga.

- (a) The sources of materials to be disposed of.
- (b) The approximate volumes and weights.
- (c) The method by which they were removed and transported.
- (d) The company contracted to remove such materials.
- (e) The final disposal or recovery location.

#### SAMPLING MANHOLE REQUIREMENTS

If, in the opinion of the Commissioner, there is not adequate provisions where representative samples can be obtained and accurate flow measurement taken, the Commissioner can require that a sampling manhole with a flow measuring device be installed by the permittee at his expense. This sampling manhole shall be approved by this office before installation. The permittee shall be responsible for all maintenance of the sampling manhole and calibration of the monitoring equipment.

#### SCHEDULE OF COMPLIANCE

The permittee shall comply with the following schedule if the present discharge does not conform to the effluent limitations prescribed within this permit:

By Sept 1, 1982 the permittee shall have tied in all zinc bearing waste streams to the zinc treatment facility and shall have completed all modifications to the zinc treatment facility in order to achieve a plant effluent with less than 5 mg/l of zinc.

#### COMPUTATION AND PAYMENTS OF INDUSTRIAL WASTE SURCHARGE

The permittee shall pay its proportionate share of the cost of operation and maintenance and local debt retirement of the treatment system to which it discharges industrial wastewater.

These charges shall be computed by the Commissioner using the formulae in Article IV, Section 4.3 of the Rules and Regulations Relating to the Use of the Public Sewer System.

Payments shall be made to the County of Onondaga by the industrial users no less often than annually.

If there is a substantial change in the wastewater characteristics and flow rate introduced into the County Treatment Plant by an industrial user, such user's industrial surcharge shall be adjusted accordingly.

OTHER REQUIREMENTS

#### AUTHORIZATION AND AGREEMENT

This permit and the authorization to discharge industrial wastewater into the public sewer system shall be legally binding upon the permittee. This permit shall expire three (3) years from the date this permit was issued. The permittee shall not discharge after the date of expiration. In order to receive a new permit and continued authorization to discharge wastewater to the public sewer system beyond the date of expiration, the permittee shall have paid all industrial waste surcharges owed to the County of Onondaga to date and submit an up-to-date industrial waste questionnaire and other information as required by the Commissioner no later than 120 days prior to the expiration of this permit.

Re: Stipulation between Cooper Industries - Crouse Hinds Division and Onondaga County

Dear Mr. Sandberg:

NICHOLAS J. PIRRO

COUNTY EXECUTIVE

Enclosed please find a Stipulation resolving Crouse Hinds's alleged violations of Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System. If this accurately reflects the terms agreed to at our prehearing conference, please have your client execute the Stipulation and return it to me within fifteen days. Payment of your fine should be made to:

Onondaga County Department of Drainage and Sanitation 650 Hiawatha Blvd., West Syracuse, NY 13204-1194 Attention: Mr. David J. Frachetti, Fiscal Officer

A fully executed copy of the Stipulation will then be returned to you for your client's records.

If you have any questions or concerns, please contact me at 315/435-2260.

Very truly yours,

## COUNTY OF ONONDAGA <u>DEPARTMENT OF DRAINAGE AND SANITATION</u>

In The Matter of COOPER INDUSTRIES, CROUSE-HINDS DIVISION Permittee,

**STIPULATION** 

Arising out of Alleged Violations of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System

WHEREAS, COOPER INDUSTRIES, CROUSE-HINDS DIVISION (Respondent) is charged with violating the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System (Rules and Regulations);

WHEREAS, the Respondent is charged with violating Article III, Section 3.06, of the aforesaid Rules and Regulations for discharging wastewater into the County sewer system containing zinc and lead in amounts exceeding County effluent limitations;

WHEREAS, the Respondent is charged with violating Article III, Section 3.06, of the aforesaid Rules and Regulations for discharging wastewater into the County sewer system containing phenolic compounds in amounts exceeding County effluent limitations; and

WHEREAS, the Respondent is charged with violating Article III, Section 3.01(c), of the aforesaid Rules and Regulations by discharging wastewater into the County sewer system containing pH in amounts exceeding the County effluent limitations; and

WHEREAS, the Respondent is charged with violating Article III, Section 3.06, of the Rules and Regulations for discharging wastewater into the County sewer system containing oil & grease in amounts exceeding the County effluent limitations; and

WHEREAS, the Respondent neither admits nor denies the aforementioned violations; and

WHEREAS, the County and the Respondent are desirous of resolving these matters without a lengthy administrative hearing; and

WHEREAS, Respondent has provided information to the County demonstrating that Respondent has spent over three million dollars for environmental control equipment since 1983: and

WHEREAS, Respondent is investing \$285,000 in 1994 to reduce wastewater discharge to the county sewer system;

THEREFORE, the parties stipulate to the following:

FIRST: The Respondent shall pay the sum of Fourteen Thousand Five Hundred Fifty-Five Dollars (\$14,555.00) to the County as a fine for allegedly violating Article III. Section 3.06, of the Rules and Regulations for discharging wastewater into the County sewer system in excess of limits for phenolic compounds; and

SECOND: That the Respondent shall pay to the County the sum of Seventeen Thousand Nine Hundred Eighty-Five Dollars and Fifty Cents (\$17,985.50) as a fine for allegedly violating Article III, Section 3.01(c), of the aforesaid Rules and Regulations by discharging wastes into the County sewer system in excess of the limits for pH; and

THIRD: The Respondent shall pay the County the sum of Fifty Two Thousand Nine Hundred Seventy-Seven Thousand Doilars (\$52,977.00) as a fine for allegedly violating Article III, Section 3.06, of the aforesaid Rules and Regulations by discharging wastes into the County sewer system in excess of the limits for oil & grease; and

FOURTH: The Respondent shall pay the County the sum of Two Thousand Eight Hundred Forty Dollars (\$2,840.00) as a fine for allegedly violating Article III, Section 3.06, of the aforesaid Rules and Regulations by discharging wastes into the County sewer system in excess of the limits for lead and zinc; and

FIFTH: Of the aggregate sum of Eighty-Eight Thousand Three Hundred Fifty-Seven Thousand Dollars and Fifty Cents (\$88,357.50). Respondent shall pay Thirty-Nine Thousand One Hundred Twelve Dollars (\$39,112.00) to Onondaga County Department of Drainage and Sanitation within thirty days of the execution of this Stipulation. The remaining sum of Forty-Nine Thousand Two Hundred Forty Five Dollars and Fifty Cents (\$49,245.50) shall be suspended pursuant to the terms outlined in paragraph Eighth; and

SIXTH: The Respondent shall establish consistent compliance during the six-month period following execution of this stipulation. Said sampling shall occur during periods typical of normal operation and shall be done in accordance with the terms of Industrial Wastewater Permit #5; and

SEVENTH: In the event of Respondent failing to establish compliance during the aforementioned six-month compliance period, Respondent, within 30 days, shall submit a report describing all remedial measures to be taken including a time table schedule for implementing said measures.

EIGHTH: Failure by the Respondent to comply with any requirement of this Stipulation shall require it to automatically pay without demand stipulated penalties as follows:

a. For failure to establish consistent compliance as set forth in paragraph Sixth above within the time period provided therein, Respondent shall pay a stipulated penalty of \$1,000 per day for each such violation for each day that such violation continues; and

NINTH: That the terms and conditions of this Stipulation may be delayed or modified if the Respondent, its consultants, or agents cannot comply with the terms of this Stipulation because of an Act of God, war, strike, or other condition as to which conduct on the part of the Respondent, its consultants or agents was not the proximate cause; provided, however, that the Respondent notifies the County within 24 hours by telephone and within 5 days in writing when it obtains knowledge of any such condition and requests an appropriate extension or modification of the provisions hereof; and

TENTH: That this Stipulation shall apply to, and be binding upon, the parties, their offices, agents, servants, employees, successors and assigns, and each of them, and upon all persons, firms and corporations acting under, through or for, in active concert or participation with the parties or any of them; and

ELEVENTH: That nothing in this Stipulation shall relieve Respondent from its obligations pursuant to the Rules and Regulations and all requirements contained in the Respondent's Industrial Wastewater Discharge Permit No. 5 nor prohibit the County from seeking penalties for violations occurring during and/or following compliance monitoring in amounts which may be greater than the amount stipulated to in Paragraph Eighth; and

TWELFTH: That payment of said sums and compliance with paragraphs FIRST through ELEVENTH shall be in full and final satisfaction of any and all costs, charges, penalties and/or expenses associated with any and all violations of the aforesaid Rules and Regulations known to the County occurring prior to the date of the execution of this Stipulation.

NYSDES SPDES STORMWATER PERMIT

#### NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION STATE FOLLUTANT DISCHARGE ELIMINATION SYSTEM (SPDES) STORM WATER GENERAL PERMIT COVERAGE NOTICE

March 22, 1994

Dear Operator:

Your Notice of Intent (NDI) for the facility noted below has been processed by the New York State Department of Environmental Conservation. This facility is authorized to discharge storm water associated with industrial or construction activity under the terms and conditions imposed by DEC's SPDES storm water general permit issued for use in the state of New York. Your facility's SFDES storm water permit number is NYROOBOGE.

New York's storm water general permit requires certain storm water pollution presention and control measures, possible monitoring and reporting, and annual inspections. Among the conditions and requirements of this permit, you must prepare and implement a pollution prevention plan (PFP) that is tailored to your industrial or construction site. Enclosed is a summary guidance document designed to assist you in the development and implementation of your FFP. The summary is organized according to the phases of the pollution prevention planning process. A set of worksheets and an example of a pollution prevention plan are provided for your assistance. As a facility authorized to discharge under this storm water general permit, all terms and conditions must be complied with to maintain coverage and avoid possible penalties.

FACILITY: Crouse-hinds Division Wolf & 7th North St Syracuse, NY 13221-4999 430500, 0760931, OFFRATOR: Crouse hirds Division Wolf & 7th North St Syracuse NY 13921-4999

If you have general questions concerning the storm water program, please call (518)457-9601. If you need to obtain a copy of the permit, please contact DEC at (800)952-2490.

Re: Notice of Violation of "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System; Industrial Wastewater Discharge Permit #5; and Order of Compliance

Mr. Evans:

Please take notice that Crouse Hinds has incurred the following violations pursuant to the "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" and Industrial Wastewater Discharge Permit #5.

Date	Location	Parameter	Limitations	Sample Results	Sample Origin
11/29/94	Sewer #4	Phenols	.0384 lbs/day	.0900 lbs/day	SMR
11/30/94	Sewer #4	Phenols	.0384 lbs/day	.1917 lbs/day	SMR
11/30/94	Sewer #4	Phenols	.0384 lbs/day	.4638 lbs/day	OCDDS
12/1/94	Sewer #4	Phenols	.0302 lbs/day	.1775 lbs/day	OCDDS
1/5/95	Sewer #1	рН	5.5-9.5 S.U.	9.78 S.U.	Crouse- Hinds
1/5/95	Sewer #1	pН	5.5-9.5 S.U.	10.1 S.U.	OCDDS
1/23/95	Sewer #4	Phenols	.032 lbs/day	.1392 lbs/day	SMR

It is understood that Michael Kulba of your department properly notified Michael Lannon of this office on December 29, 1994 for the two SMR phenol violations of November 29 and 30, 1994. This department is in receipt of Mr. Kulba's notification letter dated January 3, 1995 regarding same. Additionally, it is understood that Mr. Kulba properly notified Michael Lannon of this office on January 5, 1995 regarding the pH violation at sewer #1 on that same day. We are also in receipt of his letter dated January 9, 1994 (typo, should have been 1995) regarding same. Lastly, it is acknowledged that Mr. Kulba also properly notified Michael Lannon on February 24, 1995 of the January 23, 1995 phenol violation. Written notification for that violation was sent by Mr. Kulba in a letter dated February 28, 1995.

It is our understanding that Crouse Hinds is still looking into why the phenol violations occurred and exploring possible remedies. As stated in Mr. Kulba's letter of January 9, 1994 (should be 1995), the pH violation was a result of power plant personnel failing to neutralize boiler blowdown wastewater (which was being blown down because of an insurance inspection). As a result of the aforementioned violations, Crouse Hinds is being issued the attached Compliance Order.

Please take note that the New York State Freedom of Information Law (FOIL) provides the public with access to government records, as do subpoenas for County records made relative to litigation. Therefore, information submitted to Onondaga County Department of Drainage and Sanitation by a commercial enterprise may be subject to public disclosure unless it falls within a protected category or is otherwise nondisclosable pursuant to state and federal law.

Certain business information may be considered confidential if it concerns trade secrets or information which, if disclosed, would injure the competitive position of a business. This information, which is obtained by OCDDS in the course of regulating use of the County sewer system, may be protected from disclosure via FOIL requests. To do so, an assertion of confidentiality must be made at the time information is received by OCDDS using OCDDS guidelines. If no such request is made by a commercial enterprise, all information will be made available to the public by OCDDS upon receipt of a FOIL request. Guidelines for the assertion of a confidentiality claim may be obtained upon request to OCDDS.

This office reserves the right to seek any and all remedies available to it under Article VII of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System including, but not limited to, fines and penalties of up to \$1,000 per day per violation. Should you have any questions regarding this matter, please do not hesitate to contact Sandy Tuori-Bell or Michael Lannon of this office.

Sincerely,

DEPARTMENT OF DRAINAGE AND SANITATION

JOŚEPH J. MASTRIANO

### COUNTY OF ONONDAGA DEPARTMENT OF DRAINAGE AND SANITATION

In the Matter of the Complaint against

**COMPLIANCE ORDER** 

Crouse	Hinds	Company	
			 Respondent

#### LEGAL AUTHORITY

The following findings are made and order issued pursuant to the authority vested in the County of Onondaga and the Commissioner of the Department of Drainage and Sanitation by the Onondaga County Charter and Code; by Local Law No. 3; and by the "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" (Rules and Regulations). This order is based on findings of violations of Crouse Hinds' Industrial Wastewater Discharge Permit #5.

#### **FINDINGS**

- 1. Crouse Hinds discharges nondomestic wastewater containing pollutants into the sanitary sewer system of the County of Onondaga (hereafter "County").
- 2. Crouse Hinds is an "industrial user" as defined by Article II, Section 2.02, of the Rules and Regulations.
- 3. Crouse Hinds has been issued Wastewater Discharge Permit #5 which contains prohibitions, restrictions, and other limitations on the quality of the wastewater it discharges to the sanitary sewer.
- 4. Pursuant to the above-referenced permit, data is routinely collected or submitted on the compliance status of Crouse Hinds.
- 5. In the attached Notice of Violation, Crouse Hinds is alleged to have discharged wastewater in violation of categorical phenol and County pH effluent limitations.

#### **ORDER**

THEREFORE, BASED ON THE ABOVE FINDINGS, CROUSE HINDS IS HEREBY ORDERED TO ADHERE TO THE FOLLOWING.

- 1. Sample and analyze wastewater from sewer #4 for phenols for four consecutive days typical of normal production. Grab samples shall be taken for phenols.
- 2. All sampling and analyses must be executed by a New York State Department of Health certified laboratory (in accordance with USEPA methodologies).
- 3. The results of the resampling are to be submitted to this department on or before April 15, 1995. The submittal must also state the reason(s) for noncompliance and what actions, if any, were implemented to rectify the situation. The results and reasons for the noncompliance must be submitted on the attached NOV Response Form.
- 4. Crouse Hinds shall submit procedures for boiler blowdown to this office by April, 15, 1995.
- 5. For all future Self-Monitoring Report (SMR) submissions, Crouse Hinds shall use .646 (maximum one-day) and .225 (maximum monthly average) multipliers for calculating phenol limits from sewer #4. Further, the following information must be submitted for future SMRs for sewer #4: 1) the total volume of wastewater discharged (gpd) to sewer #4 for each monitoring day; 2) volume (in billion standard cubic feet-BSCF) of air scrubbed from Iron Foundry operations; and 3) volume (in BSCF) of air scrubbed from Aluminum Foundry operations. This in addition to what you already submit with each SMR. Both air flow sources must be included in calculating discharge mass (in this case, pounds) limits for sewer #4.
  - a. This order does not constitute a waiver of Wastewater Discharge Permit #5 which remains in full force and effect. The County reserves the right to seek any and all remedies available to it under Article VII of the Rules and Regulations for any violation cited by this order.
  - b. Failure to comply with the requirements of this order shall constitute a further violation of the sewer use ordinance and may subject Crouse Hinds to civil or criminal penalties or such other appropriate enforcement response as may be appropriate.

This order, entered this 3 H. day of High 1995, shall be effective upon receipt by Crouse Hinds.

Re: Notice of Violation of "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" for Building 50 Manufacturing Center

Mr. Evans:

Please take notice that Crouse Hinds has incurred the following violation pursuant to the "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System".

Date	Location	<u>Parameter</u>	Limitation (mg/l)	Sample Result (mg/l)
11/15/94	Sewer#F	O&G	150	260

It is understood that Michael Kulba of your department properly notified Michael Lannon of this office on November 17, 1994 of the violation. Further, written notification for the violation will be sent within five days.

As you know, this violation was discovered during the baseline testing program mandated in commissioner Karanik's letter dated October 3, 1994. In that letter (condition #4), Crouse Hinds was instructed to cease all wastewater discharges to the sanitary sewer in the event a violation is detected. However, it is understood from the phone conversation between Mr. Kulba and Mr. Lannon on November 17, that this sample should not be considered representative of normal operations (for O&G levels). This is because of the debugging and fine tuning that this new operation is undergoing. As such, be advised that you do not have to cease process wastewater discharges to the sanitary sewer. However, Crouse Hinds must sample one additional day for O&G at Building 50.

Notice of Violation of "Onondaga County Rules and Re: Regulations Relating to the Use of the Public Sewer System" and Industrial Wastewater Discharge Permit #5

Mr. Evans:

Please take notice that Crouse Hinds has incurred the following violations pursuant to the "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" and Industrial Wastewater Discharge Permit #5.

<u>Date</u>	Location	<u>Parameter</u>	Limitation (mg/l)	Sample Result (mg/l)
4/20/94	Sewer #1	Zn	5.0	8.3
4/22/94	Sewer #4	Phenols	.225	.23689
7/7/94	Sewer #1	O&G	150	187

The April 20 and 22, 1994, violations were documented in Crouse Hinds' July 1994 Self-Monitoring Report (SMR) submission. It is understood from your letter of July 26, 1994, that resampling has been conducted for pH, Zn, and phenols and demonstrated compliance. The July 7, 1994, violation was discovered during recent county monitoring events (refer to the attached). As a result of the aforementioned violation, Crouse Hinds is being issued the attached compliance order.

JOHN M. KARANIK COMMISSIONER

Be advised that the New York State Freedom of Information Law (FOIL) provides the public with access to government records, as do subpoenas for County records made relative to litigation. ### COUNTY OF ONONDAGA DEPARTMENT OF DRAINAGE AND SANITATION

In the Matter of the Complaint against

**COMPLIANCE ORDER** 

Crouse :	Hinds	Com	pany
----------	-------	-----	------

Respondent

#### **LEGAL AUTHORITY**

The following findings are made and order issued pursuant to the authority vested in the County of Onondaga and the Commissioner of the Department of Drainage and Sanitation by the Onondaga County Charter and Code; by Local Law No. 3; and by the "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" (Rules and Regulations). This order is based on findings of violations of Crouse Hind's Company's Industrial Wastewater Discharge Permit #5.

#### **FINDINGS**

- 1. Crouse Hinds Company (hereafter "Crouse Hinds") discharges nondomestic wastewater containing pollutants into the sanitary sewer system of the County of Onondaga (hereafter "County").
- 2. Crouse Hinds is an "industrial user" as defined by Article II, Section 2.02, of the Rules and Regulations.
- 3. Crouse Hinds has been issued Wastewater Discharge Permit #5 which contains prohibitions, restrictions, and other limitations on the quality of the wastewater it discharges to the sanitary sewer.
- 4. Pursuant to the above-referenced permit, data is routinely collected or submitted on the compliance status of Crouse Hinds.
- 5. In the attached Notice of Violation, Crouse Hinds is alleged to have discharged wastewater exhibiting an oil & grease concentration of 187 mg/l on July 7, 1994.

#### **ORDER**

THEREFORE, BASED ON THE ABOVE FINDINGS, CROUSE HINDS IS HEREBY ORDERED TO ADHERE TO THE FOLLOWING.

- 1. Sample and analyze wastewater from sewer #1 for oil & grease for four consecutive days typical of normal production. Grab samples shall be taken for oil & grease.
- 2. All sampling and analyses must be executed by a New York State Department of Health certified laboratory (in accordance with USEPA methodologies).
- 3. The results of the resampling are to be submitted to this department on or before October 31, 1994. The submittal must also state the reason(s) for noncompliance and what actions, if any, were implemented to rectify the situation. The results and reasons for the noncompliance must be submitted on the attached NOV Response Form.
  - a. This order does not constitute a waiver of Wastewater Discharge Permit #5 which remains in full force and effect. The County reserves the right to seek any and all remedies available to it under Article VII of the Rules and Regulations for any violation cited by this order.
  - b. Failure to comply with the requirements of this order shall constitute a further violation of the sewer use ordinance and may subject Crouse Hinds to civil or criminal penalties or such other appropriate enforcement response as may be appropriate.

Richard Evans Crouse Hinds Company P. O. Box 4999 Syracuse, New York 13221

Re: Notice of Violation of "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" and Industrial Wastewater Discharge Permit #5 and Order of Compliance

Mr. Evans:

Please take notice that Crouse Hinds has incurred the following violations pursuant to the "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" and Industrial Wastewater Discharge Permit #5.

<u>Date</u>	Location	<u>Parameter</u>	<b>Limitation</b>	Sample Result
6/7	Sewer #1	O&G	150 mg/l	368 mg/l
6/9	Sewer #1	O&G	150 mg/l	210 mg/l
7/22 (4:00 a.m.)	Sewer #1	pН	5.5-9.5 S.U.	9.8 S.U.
7/22 (6:15- 8:00 a.m.)	Sewer #1	pН	5.5-9.5 S.U.	9.7 S.U.

The O&G violations were discovered during recent county monitoring events (refer to the attached). The pH violations were discovered with Crouse Hinds' continuous pH recorder and are attributed to pH monitoring equipment malfunctions. Additionally, it is understood that on June 27, 1994, Crouse Hinds had a small spill (approximately 10 gallons) of water based coolant due to a forklift accident. A portion of this material entered sewer #1. This constitutes a violation of Section V of Permit #5. It is further understood that Mike Kulba (from Crouse Hinds) properly notified Michael Lannon of this office of the pH violations and spill. As a result of the aforementioned violations, Crouse Hinds is being issued the attached Compliance Order.

Be advised that the New York State Freedom of Information Law (FOIL) provides the public with access to government records, as do subpoenas for County records made relative to litigation. Therefore, information submitted to Onondaga County Department of Drainage and Sanitation by a commercial enterprise may be subject to public disclosure unless it falls within a protected category or is otherwise nondisclosable pursuant to state and federal law.

Certain business information may be considered confidential if it concerns trade secrets or information which, if disclosed, would injure the competitive position of a business. This information, which is obtained by OCDDS in the course of regulating use of the County sewer system, may be protected from disclosure via FOIL requests. To do so, an assertion of confidentiality must be made at the time information is received by OCDDS using OCDDS guidelines. If no such request is made by a commercial enterprise, all information will be made available to the public by OCDDS upon receipt of a FOIL request. Guidelines for the assertion of a confidentiality claim may be obtained upon request to OCDDS.

This office reserves the right to seek any and all remedies available to it under Article VII of the Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System including, but not limited to, fines and penalties of up to \$1,000 per day per violation. Should you have any questions regarding this matter, please do not hesitate to contact Sandy Tuori-Bell or Michael Lannon of this office.

File #16-Crouse Hinds

### COUNTY OF ONONDAGA <u>DEPARTMENT OF DRAINAGE AND SANITATION</u>

In the Matter of the Complaint against

**COMPLIANCE ORDER** 

Crouse Hinds Company	
	Respondent

#### LEGAL AUTHORITY

The following findings are made and order issued pursuant to the authority vested in the County of Onondaga and the Commissioner of the Department of Drainage and Sanitation by the Onondaga County Charter and Code; by Local Law No. 3; and by the "Onondaga County Rules and Regulations Relating to the Use of the Public Sewer System" (Rules and Regulations). This order is based on findings of violations of Crouse Hind's Company's Industrial Wastewater Discharge Permit #5.

#### **FINDINGS**

- 1. Crouse Hinds Company (hereafter "Crouse Hinds") discharges nondomestic wastewater containing pollutants into the sanitary sewer system of the County of Onondaga (hereafter "County").
- 2. Crouse Hinds is an "industrial user" as defined by Article II, Section 2.02, of the Rules and Regulations.
- 3. Crouse Hinds has been issued Wastewater Discharge Permit #5 which contains prohibitions, restrictions, and other limitations on the quality of the wastewater it discharges to the sanitary sewer.
- 4. Pursuant to the above-referenced permit, data is routinely collected or submitted on the compliance status of Crouse Hinds.
- 5. In the attached Notice of Violation, Crouse Hinds is alleged to have discharged wastewater exhibiting oil & grease concentrations of 368 and 210 mg/l on June 7 and 9, 1994, respectively.

#### **ORDER**

THEREFORE, BASED ON THE ABOVE FINDINGS, CROUSE HINDS IS HEREBY ORDERED TO ADHERE TO THE FOLLOWING.

- 1. Sample and analyze wastewater from sewer #1 for oil & grease and pH for four consecutive days typical of normal production. The pH must be monitored with a continuous pH recorder. Grab samples shall be taken for oil & grease.
- 2. All sampling and analyses must be executed by a New York State Department of Health certified laboratory (in accordance with USEPA methodologies).
- 3. The results of the resampling are to be submitted to this department on or before September 15, 1994. The submittal must also state the reason(s) for noncompliance and what actions, if any, were implemented to rectify the situation. The results and reasons for the noncompliance must be submitted on the attached NOV Response Form.
  - a. This order does not constitute a waiver of Wastewater Discharge Permit #5 which remains in full force and effect. The County reserves the right to seek any and all remedies available to it under Article VII of the Rules and Regulations for any violation cited by this order.
  - b. Failure to comply with the requirements of this order shall constitute a further violation of the sewer use ordinance and may subject Crouse Hinds to civil or criminal penalties or such other appropriate enforcement response as may be appropriate.

This order, entered this 11/10.	day of August	1994, shall be effective upon
receipt by Crouse Hinds.	•	•

JOHN M. KARANIK COMMISSIONER

Mr. Richard Evans Crouse Hinds - ECM P. O. Box 4999 Syracuse, New York 13221

Re: SMR Deficiency Notice

Mr. Evans:

The purpose of this letter is to inform you of several deficiencies contained in the first quarter 1994 self-monitoring report.

- 1. The authorized representative listed on page 1 is Thomas M. Carmazzi. This office has recorded that the authorized representative for Crouse Hinds is Richard Francis. Any change in the authorized representative for Crouse Hinds must be submitted in writing. Please submit a formal, written notification of the current authorized representative for Crouse Hinds by 7/30/94.
- 2. The sewer #4 phenol results for the period from 1/25/94 1/28/94 indicate three violations of the current mass-based limit as indicated in Table II and Form A. The resampling was said to indicate full compliance on Form A, however, Table II indicates that the sample result for 3/1/94 and subsequent mass-loadings are still in violation. It is understood that Crouse Hinds has implemented a phenol violation abatement program including an enhanced solids removal system. Therefore, no further action is required at this time.
- 3. The rotoclone daily airflow reporting has been inconsistent between the fourth quarter 1993 report and the first quarter 1994 report. Specifically, the flows reported for 10/93 through 12/93 were all the same number and the units were in SCFM. The flows reported for 1/94 through 3/94 were different numbers ranging from approximately 18 to 65 and the units were in BSCF.

These reporting inconsistencies make the interpretation of the calculated mass loading limits difficult. The limits currently listed in Permit #5 are based on airflow of approximately 65 million SCF per day. The 10/93 through 12/93 conform to this calculated limit. The 1/94 through 3/94 reported daily airflows do not and are actually three orders of magnitude greater than the airflow used for the mass-based limits.

Table 1 (attached) provides a matrix for calculating the mass-based limits for a variety of different airflows. It is this office's interpretation of the 40 CFR Part 464 regulations that, unlike metal pouring rates which are fixed, the airflow rates and subsequent limits calculation are based on each day's actual airflow. In the next self-monitoring report, be sure to check the units for airflow reporting. In addition, please provide this office with the correct airflows for the period from 10/93 through 3/94 by 5/30/94. In the 5/30/94 submission, include your comments regarding the interpretation of the 40 CFR Part 464 mass-based limits calculations detailed above.

Should you have any questions, please contact me.
